English

Please read these instructions before operating your set
and retain them for future reference.

Dear Panasonic Customer

Welcome to the Panasonic family of customers. We hope that you will have many years of enjoyment from your new Plasma Display.

To obtain maximum benefit from your set, please read these Instructions before making any adjustments, and retain them for future reference.

Retain your purchase receipt also, and note down the model number and serial number of your set in the space provided on the rear cover of these instructions.

Visit our Panasonic Web Site <http://panasonic.net>

Important Safety Notice

WARNING

- 1) To prevent damage which may result in fire or shock hazard, do not expose this appliance to dripping or splashing.
Do not place containers with water (flower vase, cups, cosmetics, etc.) above the set. (including on shelves above, etc.)
No naked flame sources, such as lighted candles, should be placed on / above the set.
- 2) To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.
- 3) Do not remove the earthing pin on the power plug. This apparatus is equipped with a three pin earthing-type power plug. This plug will only fit an earthing-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact an electrician.
Do not defeat the purpose of the earthing plug.
- 4) To prevent electric shock, ensure the earthing pin on the AC cord power plug is securely connected.

CAUTION

This appliance is intended for use in environments which are relatively free of electromagnetic fields. Using this appliance near sources of strong electromagnetic fields or where electrical noise may overlap with the input signals could cause the picture and sound to wobble or cause interference such as noise to appear. To avoid the possibility of harm to this appliance, keep it away from sources of strong electromagnetic fields.

IMPORTANT INFORMATION

If a display is not positioned in a sufficiently stable location, it can be potentially hazardous due to falling. Many injuries, particularly to children, can be avoided by taking simple precautions such as:

- Using cabinets or stands recommended by the manufacturer of the display.
- Only using furniture that can safely support the display.
- Ensuring the display is not overhanging the edge of the supporting furniture.
- Not placing the display on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the display to a suitable support.
- Not standing the displays on cloth or other materials placed between the display and supporting furniture.
- Educating children about the dangers of climbing on furniture to reach the display or its controls.

Trademark Credits

- VGA is a trademark of International Business Machines Corporation.
- Macintosh is a registered trademark of Apple Inc., USA.
- SVGA, XGA, SXGA and UXGA are registered trademarks of the Video Electronics Standard Association.
Even if no special notation has been made of company or product trademarks, these trademarks have been fully respected.
- HDMI, the HDMI Logo, and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

Note:

Do not allow a still picture to be displayed for an extended period, as this can cause a permanent image retention to remain on the Plasma Display.

Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode.

Safety Precautions

WARNING

■ Setup

This Plasma Display is for use only with the following optional accessories. Use with any other type of optional accessories may cause instability which could result in the possibility of injury.

(All of the following accessories are manufactured by Panasonic Corporation.)

• Pedestal	TY-ST42P50 (for TH-50PB2W), TY-ST65P20 (for TH-65PB2W)
• Mobile stand for Display	TY-ST50PB2 (for TH-50PB2W), TY-ST65PF1 (for TH-65PB2W), TY-ST65PB2 (for TH-65PB2W),
• Mobile stand	TY-ST58PF20 (for TH-50PB2W)
• Wall-hanging bracket (vertical)	TY-WK42PV20 (for TH-50PB2W),
• Wall-hanging bracket (angled)	TY-WK42PR20 (for TH-50PB2W), TY-WK65PR20 (for TH-65PB2W)
• Ceiling-hanging bracket	TY-CE42PS20 (for TH-50PB2W)
• Touch Panel	TY-TP50P30K (for TH-50PB2W), TY-TP65P30K (for TH-65PB2W)
• BNC Dual Video Terminal Board	TY-FB9BD
• HD-SDI Terminal Board	TY-FB9HD
• HD-SDI Terminal Board with audio	TY-FB10HD
• Dual Link HD-SDI Terminal Board	TY-FB11DHD
• Dual HDMI Terminal Board	TY-FB10HMD
• DVI-D Terminal Board	TY-FB11DD
• AV Terminal Box	TY-TB10AV
• Electronic Pen for Interactive Plasma Display	TY-TPEN2
• Electronic Pen Adapter for Interactive Plasma Display	TY-TAD20
• Electronic Pen Charger for Interactive Plasma Display	TY-TCG20
• Wireless Module	ET-WM200E

Always be sure to ask a qualified technician to carry out set-up.

Small parts can present choking hazard if accidentally swallowed. Keep small parts away from young children. Discard unneeded small parts and other objects, including packaging materials and plastic bags/sheets to prevent them from being played with by young children, creating the potential risk of suffocation.

Do not place the Plasma Display on sloped or unstable surfaces, and ensure that the Plasma Display does not hang over the edge of the base.

- The Plasma Display may fall off or tip over.

Do not place any objects on top of the Plasma Display.

- If water is spills onto the Plasma Display or foreign objects get inside it, a short-circuit may occur which could result in fire or electric shock. If any foreign objects get inside the Plasma Display, please consult your local Panasonic dealer.

Transport only in upright position!

- Transporting the unit with its display panel facing upright or downward may cause damage to the internal circuitry.

Ventilation should not be impeded by covering the ventilation openings with items such as newspapers, table cloths and curtains.

For sufficient ventilation;

If using the pedestal (optional accessory), leave a space of 10 cm or more at the top, left and right, and 7 cm or more at the rear, and also keep the space between the bottom of the display and the floor surface.

If using some other setting-up method, follow the manual of it. (If there is no specific indication of installation dimension in the installation manual, leave a space of 10 cm or more at the top, bottom, left and right, and 7 cm or more at the rear.)

When installing the Plasma Display vertically;

Turn up the power switch for the upward direction when you install the Plasma Display vertically. And set "Display orientation" to "Portrait" in Setup menu. (see page 45)

■ When using the Plasma Display

The Plasma Display is designed to operate on 220 - 240 V AC, 50/60 Hz.

Do not cover the ventilation holes.

- Doing so may cause the Plasma Display to overheat, which can cause fire or damage to the Plasma Display.

Do not stick any foreign objects into the Plasma Display.

- Do not insert any metal or flammable objects into the ventilations holes or drop them onto the Plasma Display, as doing so can cause fire or electric shock.

Do not remove the cover or modify it in any way.

- High voltages which can cause severe electric shocks are present inside the Plasma Display. For any inspection, adjustment and repair work, please contact your local Panasonic dealer.

Ensure that the mains plug is easily accessible.

An apparatus with CLASS I construction shall be connected to a mains socket outlet with a protective earthing connection.

Do not use any power supply cord other than that provided with this unit.

- Doing so may cause fire or electric shocks.

Securely insert the power supply plug as far as it will go.

- If the plug is not fully inserted, heat may be generated which could cause fire. If the plug is damaged or the wall socket is loose, they shall not be used.

Do not handle the power supply plug with wet hands.

- Doing so may cause electric shocks.

Do not do anything that may damage the power cable. When disconnecting the power cable, pull on the plug body, not the cable.

- Do not damage the cable, make any modifications to it, place heavy objects on top of it, heat it, place it near any hot objects, twist it, bend it excessively or pull it. To do so may cause fire and electric shock. If the power cable is damaged, have it repaired at your local Panasonic dealer.

If the Plasma Display is not going to be used for any prolonged length of time, unplug the power supply plug from the wall outlet.

■ If problems occur during use

If a problem occurs (such as no picture or no sound), or if smoke or an abnormal odour starts to come out from the Plasma Display, immediately unplug the power supply plug from the wall outlet.

- If you continue to use the Plasma Display in this condition, fire or electric shock could result. After checking that the smoke has stopped, contact your local Panasonic dealer so that the necessary repairs can be made. Repairing the Plasma Display yourself is extremely dangerous, and shall never be done.

If water or foreign objects get inside the Plasma Display, if the Plasma Display is dropped, or if the cabinet becomes damages, disconnect the power supply plug immediately.

- A short circuit may occur, which could cause fire. Contact your local Panasonic dealer for any repairs that need to be made.

CAUTION

■ When using the Plasma Display

Do not bring your hands, face or objects close to the ventilation holes of the Plasma Display.

- Heated air comes out from the ventilation holes at the top of Plasma Display will be hot. Do not bring your hands or face, or objects which cannot withstand heat, close to this port, otherwise burns or deformation could result.

Be sure to disconnect all cables before moving the Plasma Display.

- If the Plasma Display is moved while some of the cables are still connected, the cables may become damaged, and fire or electric shock could result.

Disconnect the power supply plug from the wall socket as a safety precaution before carrying out any cleaning.

- Electric shocks can result if this is not done.

Clean the power cable regularly to prevent it becoming dusty.

- If dust built up on the power cord plug, the resultant humidity can damage the insulation, which could result in fire. Pull the power cord plug out from the wall outlet and wipe the mains lead with a dry cloth.

Do not burn or breakup batteries.

- Batteries must not be exposed to excessive heat such as sunshine, fire or the like.

This Plasma Display radiates infrared rays, therefore it may affect other infrared communication equipment. Install your infrared sensor in a place away from direct or reflected light from your Plasma Display.

Cleaning and maintenance

The front of the display panel has been specially treated. Wipe the panel surface gently using only a cleaning cloth or a soft, lint-free cloth.

- If the surface is particularly dirty, wipe with a soft, lint-free cloth which has been soaked in pure water or water in which neutral detergent has been diluted 100 times, and then wipe it evenly with a dry cloth of the same type until the surface is dry.
- Do not scratch or hit the surface of the panel with fingernails or other hard objects, otherwise the surface may become damaged. Furthermore, avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the surface may be adversely affected.

If the cabinet becomes dirty, wipe it with a soft, dry cloth.

- If the cabinet is particularly dirty, soak the cloth in water to which a small amount of neutral detergent has been added and then wring the cloth dry. Use this cloth to wipe the cabinet, and then wipe it dry with a dry cloth.
- Do not allow any detergent to come into direct contact with the surface of the Plasma Display. If water droplets get inside the unit, operating problems may result.
- Avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the cabinet surface may be adversely affected or the coating may peel off. Furthermore, do not leave it for long periods in contact with articles made from rubber or PVC.

Control Transmitter
(R6 (UM3) Size × 2)

Power supply cord

Clamper × 1
TMME289

Ferrite core × 2
J0KG00000014

Electronic Pen set

Refer to “Operating Instructions,
Electronic Pen Operations”.

Use the Ferrite cores to comply with the EMC standard.
(refer to “Operating Instructions, Network Operations”)

Remote Control Batteries

Requires two R6 batteries.

1. Pull and hold the hook, then open the battery cover.
2. Insert batteries - note correct polarity (+ and -).
3. Replace the cover.

Helpful Hint:

For frequent remote control users, replace old batteries with Alkaline batteries for longer life.

⚠ Precaution on battery use

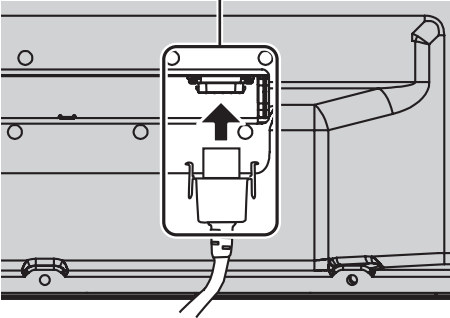

Incorrect installation can cause battery leakage and corrosion that will damage the remote control transmitter. Disposal of batteries should be in an environment-friendly manner.

Observe the following precaution:

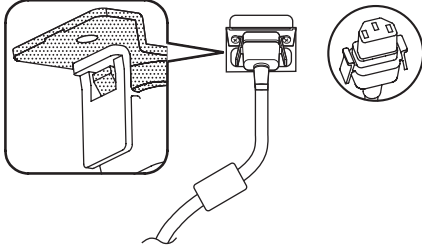

1. Batteries shall always be replaced as a pair. Always use new batteries when replacing the old set.
2. Do not combine a used battery with a new one.
3. Do not mix battery types (example: “Zinc Carbon” with “Alkaline”).
4. Do not attempt to charge, short-circuit, disassemble, heat or burn used batteries.
5. Battery replacement is necessary when remote control acts sporadically or stops operating the Plasma Display set.
6. Do not burn or breakup batteries.
7. Batteries must not be exposed to excessive heat such as sunshine, fire or the like.

Connections

AC cord connection and fixing, cable fixing

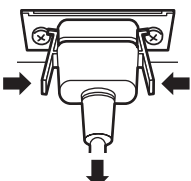

AC cord fixing

Plug the AC cord into the display unit.
Plug the AC cord until it clicks.
Note:
Make sure that the AC cord is locked on both the left and right sides.

Unplug the AC cord

Unplug the AC cord pressing the two knobs.
Note:
When disconnecting the AC cord, be absolutely sure to disconnect the AC cord plug at the socket outlet first.

When using the Wall-hanging bracket (vertical) (for TH-50PB2W)

Note:

When using the Wall-hanging bracket (vertical)(TY-WK42PV20), use the holes ① and ② to secure the cables. If the clammer is used on the hole ③, the cables may be caught by the wall-hanging bracket.

TH-50PB2W

TH-65PB2W

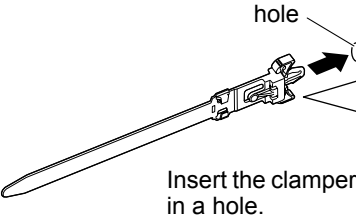

Using the clammer

Secure any excess cables with clammer as required.

Note:

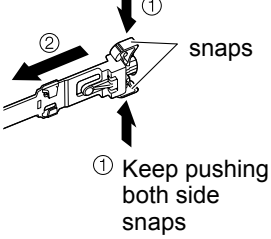

One clammer is supplied with this unit. In case of securing cables at three positions, please purchase it separately.

1 Attach the clammer

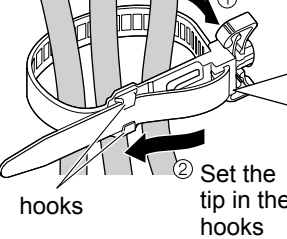

Insert the clammer in a hole.

To remove from the unit:

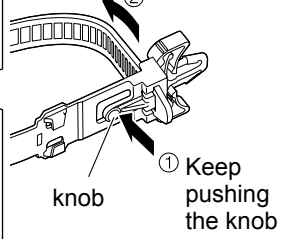

① Keep pushing both side snaps

2 Bundle the cables

② Set the tip in the hooks

To loosen:

① Keep pushing the knob

Speaker connection

For TH-50PB2W

Please use 6 Ω /8 W speaker.

For TH-65PB2W

Please use 8 Ω /10 W speaker.

Video equipment connection

Ex. TH-65PB2W

SLOT: Terminal board (optional accessories) insert slot (see page 4)

Note:

The right side slot is for terminal board with 2-slot width. The terminal board with 1-slot width does not function when installed in the right side slot.

AUDIO 1 IN: Audio input terminal shared with VIDEO and COMPONENT/RGB IN. (see page 10)

AV IN (VIDEO): Composite Video Input Terminal (see page 10)

COMPONENT/RGB IN: Component/RGB Video Input Terminal (see page 10)

Terminals are on the bottom side of the Plasma Display.

AUDIO 2 IN: Audio input terminal shared with DVI-D IN and PC IN. (see page 11, 12)

PEN ADAPTER, MEMORY/(CHARGE), CHARGE: Refer to "Operating Instructions, Electronic Pen Operations".

SERIAL: Control the Plasma Display by connecting to PC. (see page 13)

DVI-D IN: DVI-D Input Terminal (see page 11)

PC IN: PC Input Terminal

Connect to video terminal of PC or equipment with Y, Pb(Cb) and Pr(Cr) output (see page 12).

AV IN (HDMI): HDMI Input Terminal (see page 11)

Connect to video equipment such as VCR or DVD player.

WIRELESS MODULE, LAN:

Refer to "Operating Instructions, Network Operations".

VIDEO and COMPONENT / RGB IN connection

Note:

Additional equipment, cables and adapter plugs shown are not supplied with this set.

HDMI connection

⑫	_____	㉔	T.M.D.S. clock-

Notes:

- Additional equipment and cables shown are not supplied with this set.
- Use the DVI-D cable complying with the DVI standard. Image deterioration may occur depending on the length or the quality of the cable.

PC Input Terminals connection

Notes:

- With regard to the typical PC input signals that are described in the applicable input signals list (see page 60), adjustment values such as for the standard picture positions and sizes have already been stored in this unit. You can add up to eight PC input signal types that are not included in the list.
- Computer signals which can be input are those with a horizontal scanning frequency of 15 to 110 kHz and vertical scanning frequency of 48 to 120 Hz. (However, the image will not be displayed properly if the signals exceed 1,200 lines.)
- The display resolution is a maximum of 1,440 × 1,080 dots when the aspect mode is set to “4:3”, and 1,920 × 1,080 dots when the aspect mode is set to “16:9”. If the display resolution exceeds these maximums, it may not be possible to show fine detail with sufficient clarity.
- The PC input terminals are DDC2B-compatible. If the computer being connected is not DDC2B-compatible, you will need to make setting changes to the computer at the time of connection.
- Some PC models cannot be connected to the set.
- There is no need to use an adapter for computers with DOS/V compatible Mini D-sub 15P terminal.
- The computer shown in the illustration is for example purposes only.
- Additional equipment and cables shown are not supplied with this set.
- Do not set the horizontal and vertical scanning frequencies for PC signals which are above or below the specified frequency range.
- Component Input is possible with the pin 1, 2, 3 of the Mini D-sub 15P Connector.
- Change the “Component/RGB-in select” setting in the “Setup” menu to “Component” (when Component signal connection) or “RGB” (when RGB signal connection). (see page 46)

Signal Names for Mini D-sub 15P Connector

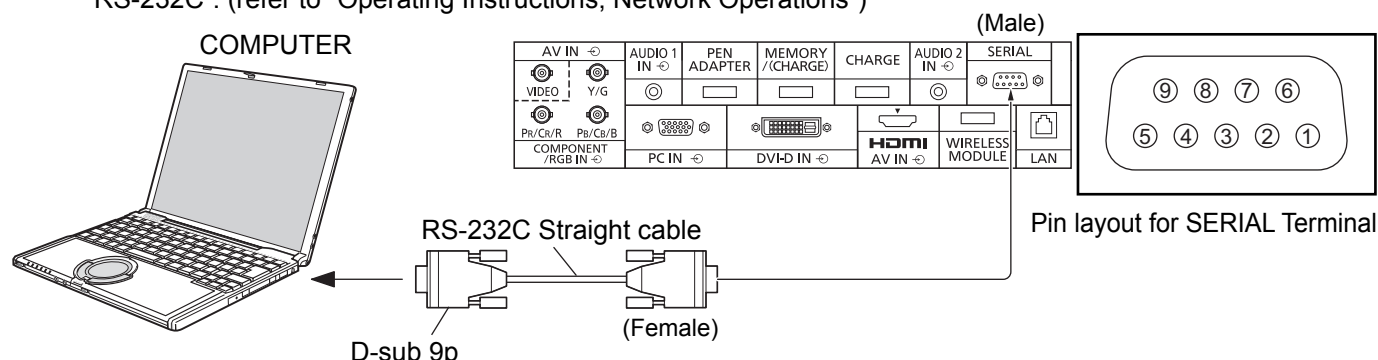

Pin Layout for PC Input Terminal

Pin No.	Signal Name	Pin No.	Signal Name	Pin No.	Signal Name

②	G (Y)	⑦	GND (Ground)	⑫	SDA
③	B (Pb/Cb)	⑧	GND (Ground)	⑬	HD/SYNC
④	NC (not connected)	⑨	+5 V DC	⑭	VD
⑤	GND (Ground)	⑩	GND (Ground)	⑮	SCL

SERIAL Terminals connection

The SERIAL terminal is used when the Plasma Display is controlled by a computer.

Note: To use serial control for this unit, make sure to set the “Control I/F Select” in the “Network Setup” menu to “RS-232C”. (refer to “Operating Instructions, Network Operations”)

Notes:

- Use the RS-232C straight cable to connect the computer to the Plasma Display.
- The computer shown is for example purposes only.
- Additional equipment and cables shown are not supplied with this set.

The SERIAL terminal conforms to the RS-232C interface specification, so that the Plasma Display can be controlled by a computer which is connected to this terminal.

The computer will require software which allows the sending and receiving of control data which satisfies the conditions given below. Use a computer application such as programming language software. Refer to the documentation for the computer application for details.

Communication parameters

Signal level	RS-232C compliant
Synchronization method	Asynchronous
Baud rate	9600 bps
Parity	None
Character length	8 bits
Stop bit	1 bit
Flow control	None

Basic format for control data

The transmission of control data from the computer starts with a STX signal, followed by the command, the parameters, and lastly an ETX signal in that order. If there are no parameters, then the parameter signal does not need to be sent.

Notes:

- If multiple commands are transmitted, be sure to wait for the response for the first command to come from this unit before sending the next command.
- If an incorrect command is sent by mistake, this unit will send an “ER401” command back to the computer.
- S1A and S1B of Command IMS are available only when a dual input terminal board is attached.
- Consult your local Panasonic dealer for detail instructions on command usage.

Signal names for D-sub 9P connector

Pin No.	Details
②	R X D
③	T X D
⑤	GND
④ • ⑥	Non use
⑦ ⑧	(Shorted in this set)
① • ⑨	NC

These signal names are those of computer specifications.

Command

Command	Parameter	Control details
PON	None	Power ON

AVL	**	Volume 00 - 63
AMT	0	Audio MUTE OFF
	1	Audio MUTE ON
IMS	None SL1 S1A S1B VD1 YP1 HM1 DV1 PC1 NW1 WB1	Input select (toggle) SLOT input (SLOT INPUT) SLOT input (SLOT INPUT A) SLOT input (SLOT INPUT B) VIDEO input (VIDEO) COMPONENT/RGB IN input (COMPONENT) HDMI input (HDMI) DVI-D IN input (DVI) PC IN input (PC) Network input (NETWORK) WhiteBoard input (WHITEBOARD)
DAM	None ZOOM FULL JUST NORM ZOM2 ZOM3 SJST SNOM SFUL 14:9	Screen mode select (toggle) Zoom, Zoom1 16:9 Just, Just1 (For Video/SD/HD signal) 4:3, 4:3 (1) Zoom2 (For Video/SD/HD signal) Zoom3 (For Video/SD/HD signal) Just2 (For HD signal) 4:3 (2) (For HD signal) 4:3 Full (For HD signal) 14:9 (For Video/SD/HD signal)

With the power off, this display responds to PON command only.

Power On / Off

Connecting the AC cord plug to the Plasma Display.

Connecting the plug to the Wall Outlet

Notes:

- Main plug types vary between countries. The power plug shown at right may, therefore, not be the type fitted to your set.
- When disconnecting the AC cord, be absolutely sure to disconnect the AC cord plug at the socket outlet first.

Press the Power switch on the Plasma Display to turn the set on: Power-On.

Power Indicator: Green

[Starting up the network]

It takes some time for the network to start up just after the power is turned on.
During that time, "Network Setup" in the "Setup" menu is grayed out and cannot be set.

Press the  button on the remote control to turn the Plasma Display off.

Power Indicator: Red (standby)

Press the  button on the remote control to turn the Plasma Display on.

Power Indicator: Green

Turn the power to the Plasma Display off by pressing the  switch on the unit, when the Plasma Display is on or in standby mode.

Note:

During operation of the power management function, the power indicator turns orange in the power off state.

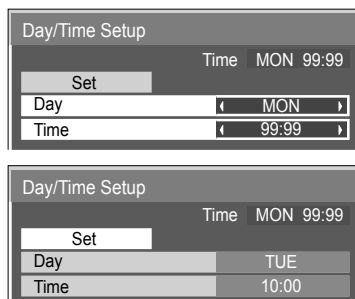

When first switching on the unit

Following screen will be displayed when the unit is turned on for the first time.
Select the items with the remote control. Unit buttons are invalid.

OSD Language

Day/Time Setup

Display orientation

Notes:

- Once the items are set, the screens won't be displayed when switching on the unit next time.
- After the setting, the items can be changed in the following menus.
OSD Language (see page 45)
Day/Time Setup (see page 33)
Display orientation (see page 45)

Power ON message

The following message may be displayed when turning the unit power ON:

Easy WhiteBoard Startup screen

When the power is turned ON with the Input switch of the WHITEBOARD, the built-in WhiteBoard software "Easy WhiteBoard" starts up.

No activity power off Precautions

'No activity power off' is enabled.

If "No activity power off" in Setup menu is set to "Enable", a warning message is displayed every time the power is turned ON. (see page 45)

Power Management Information

Last turn off due to 'Power management'.

If "PC Power management" or "DVI-D Power management" is functioned, an information message is displayed every time the power is turned ON. (see page 42)

These message displays can be set with the following menu: Options menu

- Power On Message (No activity power off)
(see page 52)
- Power On Message (Power Management)
(see page 52)

Selecting the input signal

INPUT

Press to select the input signal to be played back from the equipment which has been connected to the Plasma Display.

Input signals will change as follows:

➤ PC ➤ NETWORK ➤ WHITEBOARD ➤ VIDEO ➤ COMPONENT* ➤ HDMI ➤ DVI

PC: PC input terminal in PC IN.

NETWORK: Network input terminal in LAN or WIRELESS MODULE.

WHITEBOARD: WhiteBoard mode.

This mode can be selected when the "WHITEBOARD function" is "On". (see page 34)

VIDEO: Video input terminal in AV IN (VIDEO).

COMPONENT*: Component or RGB input terminal in COMPONENT/RGB IN.

HDMI: HDMI input terminal in AV IN (HDMI).

DVI: DVI input terminal in DVI-D IN.

* "COMPONENT" may be displayed as "RGB" depending on the setting of "Component/RGB-in select". (see page 46)

When an optional Terminal Board is installed:

➤ PC ➤ NETWORK ➤ WHITEBOARD ➤ SLOT INPUT ➤ VIDEO ➤ COMPONENT ➤ HDMI ➤ DVI

SLOT INPUT: Input terminal in Terminal Board

Note:

When a Terminal Board incompatible with the Plasma Display is installed, "Non-Compatible Function Board" is displayed.

When a Terminal Board with dual input terminals is installed:

➤ PC ➤ NETWORK ➤ WHITEBOARD ➤ SLOT INPUT A ➤ SLOT INPUT B ➤ VIDEO ➤ COMPONENT ➤ HDMI ➤ DVI

SLOT INPUT A, SLOT INPUT B: Dual input terminal in Terminal Board.

Notes:

- Selecting is also possible by pressing the INPUT button on the unit.
- Outputs the sound as set in "Audio input select" in the Options menu. (see page 55)
- Select to match the signals from the source connected to the component/RGB input terminals. (see page 46)
- Image retention (image lag) may occur on the plasma display panel when a still picture is kept on the panel for an extended period. The function that darkens the screen slightly is activated to prevent image retention (see page 58), but this function is not the perfect solution to image retention.

Basic Controls

Main Unit

Remote Control Transmitter

ACTION button

Press to make selections.

ASPECT button

Press to adjust the aspect.
(see page 19)

Standby (ON / OFF) button

The Plasma Display must first be plugged into the wall outlet and turned on at the power switch (see page 14). Press this button to turn the Plasma Display On, from Standby mode. Press it again to turn the Plasma Display Off to Standby mode.

POS./SIZE button

(see page 23)

PICTURE button

(see page 26)

Sound mute On / Off

Press this button to mute the sound.
Press again to reactivate sound.
Sound is also reactivated when power is turned off or volume level is changed.

N button

(see page 25, 26, 27, 31)

POSITION buttons

INPUT button

Press to select Input signal sequentially. (see page 16)

ECO MODE (ECO)

Press to change the ECO MODE setup status. (see page 42)

FUNCTION buttons (FUNCTION)

(see page 44)

OFF TIMER button

The Plasma Display can be preset to switch to stand-by after a fixed period. The setting changes to 30 minutes, 60 minutes, 90 minutes and 0 minutes (off timer cancelled) each time the button is pressed.

>30 min → 60 min → 90 min
0 min (Cancel) <

When three minutes remain, "Off timer 3 min" will flash.

The off timer is cancelled if a power interruption occurs.

AUTO SETUP button

Automatically adjusts the position/size of the screen. (see page 23)

SET UP button

(see page 32)

SOUND button

(see page 31)

Volume Adjustment

Press the Volume Up "+" or Down "-" button to increase or decrease the sound volume level.

R button

(see page 22)
Press the R button to return to previous menu screen.

RECALL button

Press the "RECALL" button to display the current system status.

- ① Input label
- ② Aspect mode (see page 19)
Audio input (see page 55)
Profile name (see page 30)
NANODRIFT Saver operating (see page 40)
- ③ Touch Pen mode On/Off (see page 34)
- ④ Off timer
The off timer indicator is displayed only when the off timer has been set.
- ⑤ Clock display (see page 52)

Digital Zoom (see page 20)

ASPECT Controls

The Plasma Display will allow you to enjoy viewing the picture at its maximum size, including wide screen cinema format picture.

Note:

Be aware that if you put the display in a public place for commercial purposes or a public showing and then use the aspect mode select function to shrink or expand the picture, you may be violating the copyright under copyright law. It is prohibited to show or alter the copyrighted materials of other people for commercial purposes without the prior permission of the copyright holder.

ASPECT

Press repeatedly to move through the aspect options:

For details about the aspect mode, please see "List of Aspect Modes" (page 59).

[from the unit]

The aspect mode changes each time the ENTER button is pressed.

For VIDEO (S VIDEO) signal input:

→ 4:3 → Zoom1 → Zoom2 → Zoom3 → 16:9 → 14:9 → Just →

For PC signal input:

→ 4:3 → Zoom → 16:9 →

For SD signal input (525 (480) / 60i • 60p, 625 (575) / 50i • 50p):

→ 4:3 → Zoom1 → Zoom2 → Zoom3 → 16:9 → 14:9 → Just →

For HD signal input [1125 (1080) / 60i • 50i • 60p • 50p • 24p • 25p • 30p • 24sF, 1250 (1080) / 50i, 750 (720) / 60p • 50p]:

→ 4:3 → 4:3 Full → Zoom1 → Zoom2 →
Just ← 14:9 ← 16:9 ← Zoom3 ←

[For Touch Pen mode]

The aspect is fixed as "16:9" and you cannot switch.

Notes:

- The aspect mode is memorized separately for each input terminal.
- Do not allow the picture to be displayed in 4:3 mode for an extended period, as this can cause a permanent image retention to remain on the Plasma Display Panel.

All Aspect mode

Set "All Aspect" to "On" in Options menu to enable the extended aspect mode (page 52). When All Aspect mode, the aspect mode of pictures is switched as follows. For details about the aspect mode, please see "List of Aspect Modes". (page 59)

For VIDEO (S VIDEO) signal input:

→ 4:3 → Zoom1 → Zoom2 → Zoom3 → 16:9 → 14:9 → Just →

For PC signal input:

→ 4:3 → Zoom → 16:9 →

For SD signal input (525 (480) / 60i • 60p, 625 (575) / 50i • 50p):

→ 4:3 → Zoom1 → Zoom2 → Zoom3 → 16:9 → 14:9 → Just →

For HD signal input [1125 (1080) / 60i • 50i • 60p • 50p • 24p • 25p • 30p • 24sF, 1250 (1080) / 50i, 750 (720) / 60p • 50p]:

→ 4:3 Full → Zoom1 → Zoom2 → Zoom3 → 16:9 → 14:9 → Just1 → Just2 → 4:3 (1) → 4:3 (2) →

Digital Zoom

This displays an enlargement of the designated part of the displayed image.

1 Display the operation guide.

ZOOM
 Press to access Digital Zoom.
 The operation guide will be displayed.

During Digital Zoom, only the following buttons can be operated.

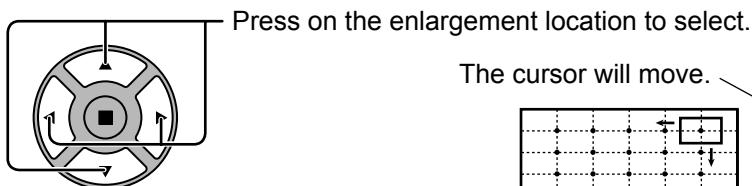

[Remote control]

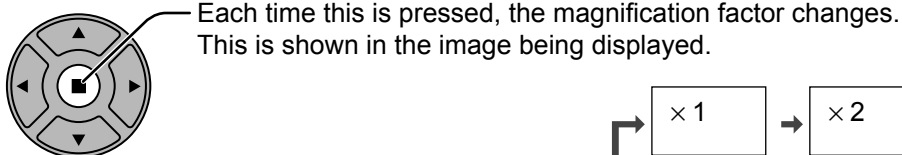

[Unit]

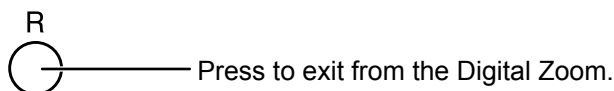

2 Select the area of the image to be enlarged.

3 Select the magnification required for the enlarged display.

4 Return to normal display (quit Digital Zoom).

Touch Pen mode during Digital Zoom

The electronic pen cannot be used while the image is enlarged with Digital Zoom during Touch Pen mode. The electronic pen can be used when Digital Zoom is cancelled.

Notes:

- When power goes OFF (including "Off Timer" operation), Digital Zoom terminates.
- The Digital Zoom function cannot be selected while in the following operation state:
 When WHITEBOARD input.
 When two screen display.
 When Screensaver (except for Negative image) is running (see page 37)
- While Digital Zoom is in operation, "Adjusting Pos./Size" cannot be used.

MULTI PIP

You can display two pictures, such as a video image and computer image, in a two-screen display.

Notes:

- If "Input lock" in Options menu is set to other than "Off", two screen display function isn't available (see page 51).
- 2k1k signals that are received with the Dual Link HD-SDI Terminal Board (TY-FB11DHD) cannot be displayed in two-screen display.

MULTI PIP Settings

Set the functions and mode for two-screen display in "MULTI PIP Settings" in the Setup menu. (see page 36)

PIP Mode

There are two modes for two screen display:

Pic in Pic

Displays two input images combined.

— Main screen input
— Sub screen input

The following three system inputs are combined:

- A** SLOT INPUT/NETWORK
- B** HDMI/DVI/COMPONENT/PC
- C** VIDEO

Note:

Two screen display cannot be displayed with the same system inputs such as HDMI—DVI combined.

Pic in WHITEBOARD

Displays the built-in WhiteBoard with the other input image combined.

— Main screen is fixed to WHITEBOARD.

— Inputs supported for the sub screen: HDMI/DVI/COMPONENT/PC/VIDEO

Note:

SLOT INPUT and NETWORK cannot be displayed on the sub screen.

Note:

SD signal is displayed in 4:3 mode on the sub screen.

Using Two Screen Display

Set "MULTI PIP" in "MULTI PIP Settings" to "On" (see page 36).

Two screen display appears.

Using the FUNCTION button

➡ On/Off of "MULTI PIP" switches.

➡ "MULTI PIP Settings" menu appears.

Note:

Please use the "Function Button Settings" to set the FUNCTION button (see page 44).

Switching Sub Screen Position

Press to switch the sub screen position.

Changing the Size of Sub Screen

Press to change the size of the sub screen.

Note:

Alternatively, "Sub screen size" and "Sub screen position" in "MULTI PIP Settings" can be used for the same operation (see page 36).

On-Screen Menu Displays

Remote Control

Unit

1 Display the menu screen.

Press to select.
(Example: Picture menu)

Press several times.

MENU

Each time the MENU button is pressed, the menu screen will switch.

2 Select the item.

(Example: Picture menu)

Select.

3 Set.

Set.

4 Exit the menu.

Press.
Press to return to the previous menu.

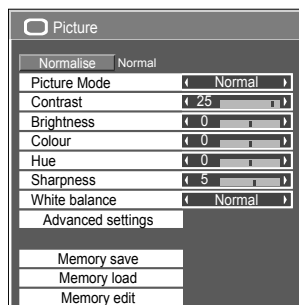

Press several times.

MENU

Menu display list

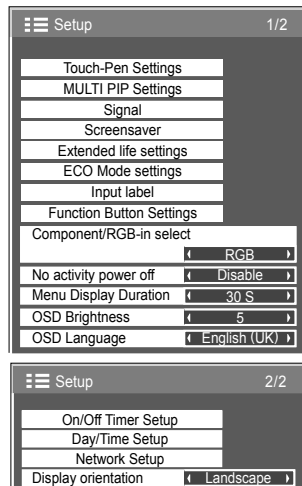

Note: Menu that cannot be adjusted is grayout. Adjustable menu changes depending on signal, input and menu setting.

Picture menu

see page 26-30

Setup menu

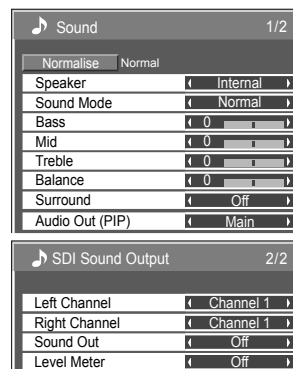

see page 32-49

Pos./Size menu

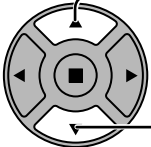

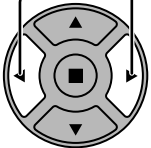

see page 23-25

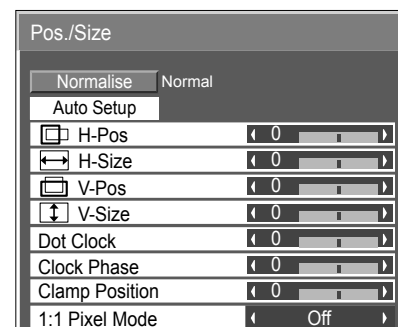

Sound menu

see page 31

Adjusting Pos./Size

- 1  Press to display the Pos./Size menu.
- 2  Press to select the menu to adjust.
- 3  Press to adjust the menu.
- 4  Press to exit from adjust mode.

Note:

Unadjustable items are grayed out.

Adjustable items differ depending on the input signal and the display mode.

Notes:

- Pos./Size cannot be adjusted with two screen display.
- Adjustment details are memorized separately for different input signal formats (Adjustments for component signals are memorized for 525 (480) / 60i · 60p, 625 (575) / 50i · 50p, 1125 (1080) / 60i · 50i · 60p · 50p · 24p · 25p · 30p · 24sF, 1250 (1080) / 50i, 750 (720) / 60p · 50p each, and RGB/PC/Digital signals are memorized for each frequency.)
- If a “Cue” or “Rew” signal from a VCR or DVD player is received, the picture position will shift up or down. This picture position movement cannot be controlled by the Picture Pos./Size function.

Auto Setup When inputting a PC signal as an example, “H-Pos/V-Pos”, “H-Size/V-Size”, “Dot Clock” and “Clock Phase” are automatically corrected.

This setting is enabled under the following conditions:

- When inputting an analog signal (Component/PC):
This setting is enabled if “Component/RGB-in select” (see page 46) in Setup menu is “RGB”.
- When inputting a digital signal (HDMI/DVI):
A PC format signal enables this setting.

When the signal is not PC format, this setting is enabled only if “Over Scan” (see page 24) is “Off” or “1:1 Pixel Mode” (see page 25) is “On”. “H-Size/V-Size” is not automatically adjusted.

This setting will be invalid and will not work under the following conditions:

- When NETWORK input is selected.
- When VIDEO signal input
- During two screen or Digital Zoom.
- Aspect is set to “Just”
- “Display size” in the Options menu (see page 51) is set to “On”

Using Remote Control

When  on the remote control is pressed, “Auto Setup” will be executed.

When Auto Setup does not work, “Invalid” is displayed.

Auto mode

When the “Auto Setup” is set to “Auto” in the Options menu (see page 52), automatic position adjustment starts:

- When the display power is turned ON.
- When the input signal is switched.

Notes:

- If the dot clock frequency of an analog signal is 162 MHz or higher, "Dot Clock" and "Clock Phase" cannot be automatically corrected.
- When digital signal input, Dot Clock and Clock Phase cannot be made.
- Auto Setup may not work when a cropped or dark image is input. In such case, switch to a bright image with borders and other objects are clearly shown, and then try auto setup again.
- Depending on the signal, out of alignment may occur after Auto Setup. Carry out fine tuning for the position/size as required.
- If Auto Setup cannot set properly for vertical frequency 60Hz XGA signal (1024×768@60Hz, 1280×768@60Hz, and 1366×768@60Hz), pre-selecting the individual signal in "XGA Mode" (see page 47) may results in correct Auto Setup.
- Auto Setup does not work well when a signal such as additional information is superimposed out of valid image period or intervals between synchronizing and image signals are short, or for image signal with tri-level synchronizing signal added.
- If Auto Setup cannot adjust correctly, select "Normalise" once and press ACTION (■), then adjust Pos./Size manually.

H-Pos

Adjust the horizontal position.

V-Pos

Adjust the vertical position.

H-Size

Adjust the horizontal size.

V-Size

Adjust the vertical size.

Dot Clock (During Component/PC input signal)

Periodic striped pattern interference (noise) may occur when a striped pattern is displayed. If this happens, adjust so that any such noise is minimized.

Clock Phase (During Component/PC input signal)

Eliminate the flickering and distortion.

Over scan Turn image over scan On/Off.

Configurable signals are as follows:

525i, 525p, 625i, 625p, 750/60p, 750/50p (Component Video, RGB, DVI, SDI, HDMI)

On

Off

Notes:

- When "Off" is set, "H-Size" and "V-Size" cannot be adjusted.
- When the "Display size" is set to "On" in the Options menu, this setting will be invalid. (see page 51)

Clamp Position (During Component/PC input signal)

Adjusts the clamp position when black parts of the image have no detail due to underexposure or are tinged with green.

Optimum value for Clamp Position adjustment

When black parts have no detail due to underexposure (blackout)

→ Value that causes least blackout is the optimum.

When black parts are tinged with green

→ Value that cancels the greenishness without causing blackout is the optimum.

1:1 Pixel Mode Adjusts the display size when 1125i, 1125p or 1250i signal is input.

Notes:

- Select On when you would like to replay 1920 × 1080 input signal.
- Applicable input signal;
1125 (1080) / 50i · 60i · 24sF · 24p · 25p · 30p · 50p · 60p, 1250 (1080) / 50i
- Select Off when flickering is shown around the image.
- H-Size and V-Size cannot be adjusted when On is selected.

1:1 Pixel Mode (2k1k) When the input signal is a 2k1k signal (2048 × 1080 / 24p, 2048 × 1080 / 24sF), the display size is adjusted as follows. (For 2k1k signals)

Note:

2k1k signals can only be received when the Dual Link HD-SDI Terminal Board (TY-FB11DHD) is installed.

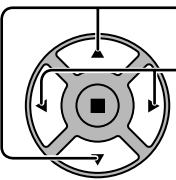

Helpful Hint (/ **Normalise** **Normalisation**)

While the Pos./Size display is active, if either the N button on the remote control is pressed at any time or the ACTION () button is pressed during "Normalise", then all adjustment values are returned to the factory settings.

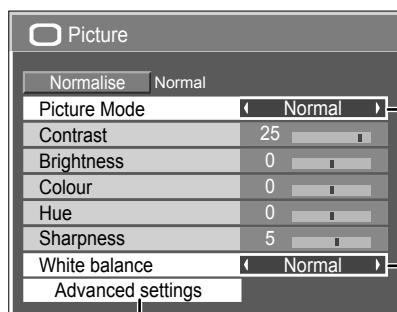

Picture Adjustments

1  Press to display the Picture menu.

2 Select to adjust each item.

 Press to select the menu to adjust.
Select the desired level by looking at the picture behind the menu.

Note:
Menu that cannot be adjusted is grayout. Adjustable menu changes depending on signal, input and menu setting.

Press to enter Advanced settings.

Advanced settings
Enables fine picture adjustment at a professional level (see next page).

Press “◀” or “▶” button to switch between modes.

→ Normal ← → Dynamic ←
→ Monitor ← → Cinema ←

Normal

For viewing in standard (evening lighting) environments. This menu selects the normal levels of Brightness and Contrast.

Dynamic

For viewing in brighter environments. This menu selects higher than normal levels of Brightness and Contrast.

Cinema

For use in viewing tone-focused pictures with brightness reduced.

Monitor

For use when creating broadcast or movie content. With this picture, even if the overall average picture level (APL) changes, the brightness of areas with the same signal level does not change.

Picture Mode during Touch Pen mode

Only “Normal” or “Dynamic” can be selected in Picture Mode during Touch Pen mode.

Notes:

- When “Monitor” is selected in Picture Mode, the following menu items cannot be set.
Extended life settings: Peak limit (see page 40)
- If you would like to change the picture and colour of the selected Picture menu to something else, adjust using the items in the Picture menu. (see next page)

Press “◀” or “▶” button to switch between modes.

→ Normal (9300K) ← → Cool (11500K) ← → Warm (6500K) ←

Helpful Hint (/ Normalise Normalisation)

While the “Picture” menu is displayed, if either the N button on the remote control is pressed at any time or the ACTION (■) button is pressed during “Normalise”, then all adjustment values are returned to the factory settings.

Item	Effect	Adjustments
Contrast	 Less  More	Selects the proper brightness and density for the room.
Brightness	 Darker  Brighter	Adjusts for easier viewing of dark pictures such as night scenes and black hair.
Colour	 Less  More	Adjusts colour saturation.
Hue	 Reddish  Greenish	Adjusts for nice skin colour.
Sharpness	 Less  More	Adjusts picture sharpness.

Notes:

- You can change the level of each function (Contrast, Brightness, Colour, Hue, Sharpness) for each Picture Mode.
- The setting details for Normal, Dynamic, Cinema and Monitor respectively are memorized separately for each input terminal.
- In Contrast, there is not a noticeable change even when contrast is increased with a bright picture or reduced with a dark picture.

Advanced settings

Item	Effect	Details
Black extension	 Less  More	Adjusts the dark shades of the image in gradation.
Input level	 Less  More	Adjustment of parts which are extremely bright and hard to see.
Gamma	 Down  Up	S Curve \longleftrightarrow 2.0 \longleftrightarrow 2.2 \longleftrightarrow 2.4 \longleftrightarrow 2.6
W/B High R	 Less  More	Adjusts the white balance for light red areas.
W/B High G	 Less  More	Adjusts the white balance for light green areas.
W/B High B	 Less  More	Adjusts the white balance for light blue areas.
W/B Low R	 Less  More	Adjusts the white balance for dark red areas.
W/B Low G	 Less  More	Adjusts the white balance for dark green areas.
W/B Low B	 Less  More	Adjusts the white balance for dark blue areas.

Notes:

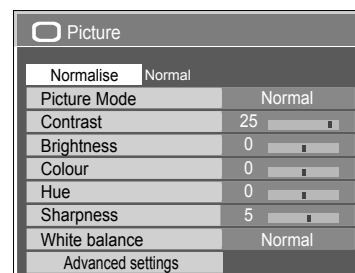

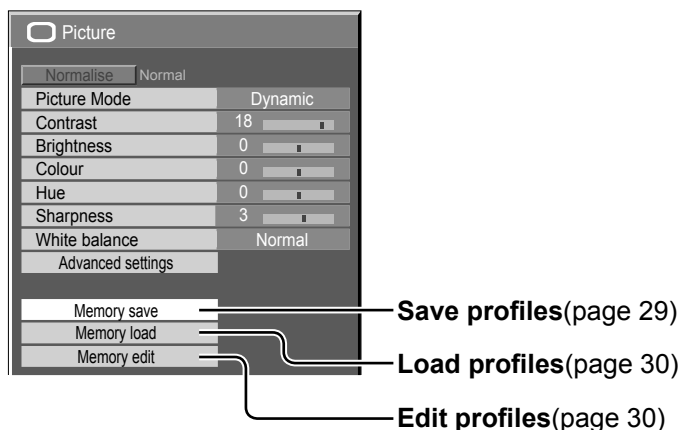

- Advanced settings cannot be adjusted with two screen display.
- Carry out "W/B" adjustment as follows.
 - Adjust the white balance of the bright sections using the "W/B High R", "W/B High G" and "W/B High B" settings.
 - Adjust the white balance of the dark sections using the "W/B Low R", "W/B Low G" and "W/B Low B" settings.
 - Repeat steps 1 and 2 to adjust.
 Steps 1 and 2 affect each other's settings, so repeat each step in turn to make the adjustment.
- The adjustment values are memorized separately for each input terminal.
- The adjustment range values should be used as an adjustment reference.

Helpful Hint (/ **Normalise** Normalisation)

On the remote control unit, while the "Advanced settings" menu is displayed, if either the N button is pressed at any time or the ACTION (■) button is pressed during "Normalise", then all adjustment values are returned to the factory settings.

Picture Profiles

Up to 8 combinations of picture adjustment values (in the Picture menu and Advanced settings) can be stored in the display memory as profiles and applied as needed, for a convenient way to enjoy your preferred picture settings.

Save profiles

Save the picture adjustment values in the MEMORY1 profile

Edit the profile
Delete or rename the profile

MEMORY8

Load the profile

Apply the MEMORY1 profile

Original picture

Custom picture

Saving profiles

Follow these steps to save picture adjustment values as profiles.

Note:

When the settings are locked in “Extended life settings”, profiles cannot be saved.

- 1 Specify the picture quality in the Picture menu and Advanced settings. (see page 26, 27)

- 2 In the Picture menu, select “Memory save”.

- 3 Select a profile name for saving the picture adjustment values.

“*” appears for a profile in which the picture adjustments have already been saved.

- 4 Select “Ok”.

- 5 Enter a name for the profile.

[Entering profile names]

Profile names can be up to 40 characters.

To enter text, select characters in the on-screen keyboard.

Edit the default profile name in the text box as desired.

Example: Specifying “MY PICTURE”

- ① Select “All delete”.

MEMORY1

All text is deleted.

To delete individual characters, select “Delete”.

- ② Select “M”.

M

Repeat this process to enter the next character.

- ③ Select “Y”.

MY

- ④ Select “Space”.

MY

- 6 When you finished entering the profile name, select “Ok”.

To cancel saving the profile, select “Cancel”.

Loading profiles

Load profiles and apply the picture adjustment values to the display as follows.

Notes:

- Loaded profiles are stored in memory according to the selected input terminal. (see page 16)
- When the settings are locked in “Extended life settings”, profiles cannot be loaded.

1 In the Picture menu, select “Memory load”.

2 Select the profile to load.

While in Touch Pen mode, a profile(s), whose “Picture Mode” is set to “Cinema” or “Monitor”, is grayed out and cannot be selected.

When profile is being loaded, profile name is displayed.

Editing profiles

Delete or rename profiles as follows.

<Deleting profiles>

1 In the Picture menu, select “Memory edit”.

2 Select “Memory delete”.

3 Select the profile to delete.
To delete all profiles, select “All delete”.

4 Select “Ok”.

<Renaming profiles>

1 In the Picture menu, select “Memory edit”.

2 Select “Memory name change”.

3 Select the profile to rename.

4 Enter a name for the profile.
Entering profile names → page 29

5 When you finished entering the profile name, select “Ok”.

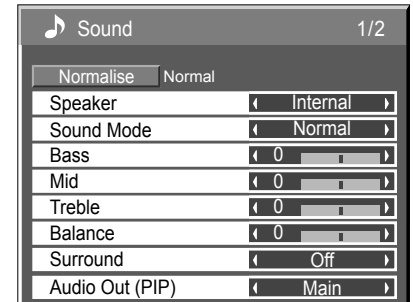

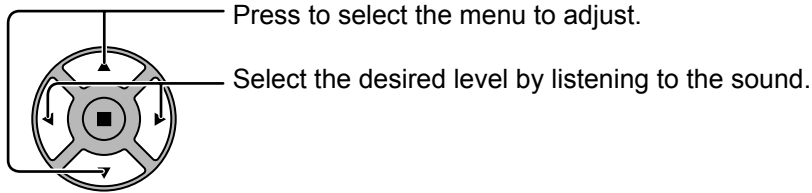

To cancel renaming the profile, select “Cancel”.

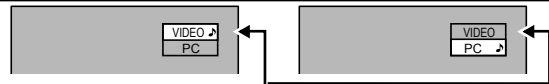

Sound Adjustment

1  Press to display the Sound menu.

2 Select to adjust each item.

3  Press to exit from adjust mode.

Item	Details
Speaker	Select the audio output. Internal: Internal speakers External: External speakers
Sound Mode	Normal: Emits the original sound. Dynamic: Accentuates sharp sound. Clear: Attenuates human voice.
Bass	Adjusts low pitch sounds.
Mid	Adjusts normal sounds.
Treble	Adjusts high pitch sounds.
Balance	Adjusts left and right volumes.
Surround	Select On or Off.
Audio Out (PIP)	Main: Selects main picture sound. Sub: Selects PIP frame sound. <div data-bbox="798 1093 1348 1176" data-label="Image">  </div> Musical note ♪ is displayed on right side of the audio output screen label.

Note: Bass, Mid, Treble and Surround settings are memorized separately for each Sound Mode.

Helpful Hint (/ **Normalise** Normalisation)

While the “Sound” menu is displayed, if either the N button on the remote control is pressed at any time or the ACTION (■) button is pressed during “Normalise”, then all adjustment values are returned to the factory settings.

SDI Sound Output

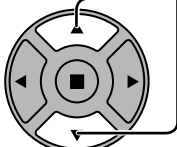

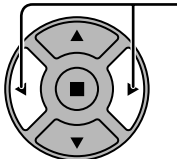

This menu is available only when selecting a slot that any of the following terminal boards is installed:
HD-SDI Terminal Board with audio (TY-FB10HD) or Dual Link HD-SDI Terminal Board (TY-FB11DHD)

Note:
This menu is unavailable when two screen display mode is active.

Item	Details
Left Channel	Channel 1 to Channel 16 Selects left audio channel.
Right Channel	Channel 1 to Channel 16 Selects right audio channel.
Sound Out	On <=> Off On: Enables audio output. Off: Disables audio output.
Level Meter	Off <=> 1-8ch <=> 9-16ch Sets audio channels to show in the audio level meter. 8 channels are displayed in the audio level meter; 4 channels each on both right and left sides of the display. Off: Hides the audio level meter. 1-8ch: Displays the audio level meter (1-8ch) 9-16ch: Displays the audio level meter (9-16ch)

Network Setup

Set this to connect the Display to a computer via a network. For details of PJLink and Network, refer to "Operating Instructions, Network Operations".

Day/Time Setup / On/Off Timer Setup

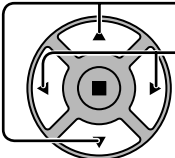

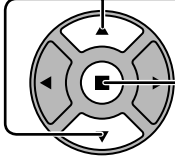

The timer can switch the Plasma Display On or Off.

Before attempting Timer Set, confirm the Time and adjust if necessary.
Then set POWER ON Time / POWER OFF Time.

-  Press to display the Setup menu.
-  Press to select On/Off Timer Setup or Day/Time Setup.
Press to display the On/Off Timer Setup screen or Day/Time Setup screen.

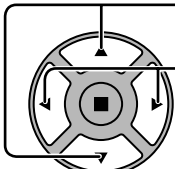

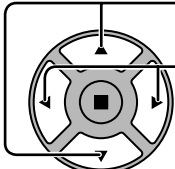

Day/Time Setup

-  Press to select Day or Time.
Press to setup Day or Time.
▶ button: Forward
◀ button: Back
Notes:
 - Pressing “◀” or “▶” button once changes Time 1 minute.
 - Pressing “◀” or “▶” button continuously changes Time by 15 minutes.
-  Press to select Set.
Press to store Day/Time Setup.
Notes:
 - Set cannot be selected unless Time is set.
 - Unless setting the present time other than “99:99”, “Day” and “Time” cannot be set.
 - The settings of “Day” and “Time” are reset when leaving the display turned off for about 7 days for the following reasons:
 - Pressing ⏻/| switch of the unit to turn off the display.
 - Disconnecting the AC cord.
 - Interruption of power supply.

On/Off Timer Setup

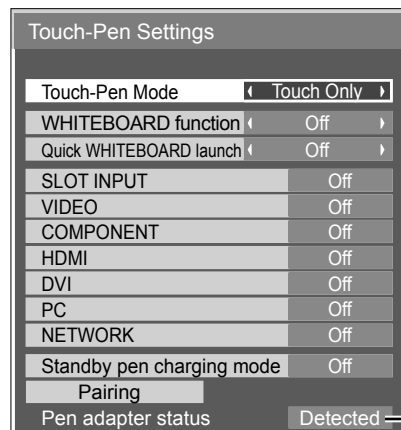

-  Press to select POWER ON Time / POWER OFF Time.
Press to setup POWER ON Time / POWER OFF Time.
▶ button: Forward
◀ button: Back
Notes:
 - Pressing “◀” or “▶” button once changes POWER ON Time / POWER OFF Time 1 minute.
 - Pressing “◀” or “▶” button continuously changes POWER ON Time / POWER OFF Time by 15 minutes.
-  Press to select POWER ON Function/POWER OFF Function.
Press to select On.
Note: Timer function will not work unless “Time” is set.

Touch-Pen Settings

Set Touch Pen mode.

Select "Touch-Pen Settings" in "Setup" menu and press  button.

When a Terminal Board with dual input terminals is installed, "SLOT INPUT" is displayed as "SLOT INPUT A" and "SLOT INPUT B".

Pen adapter status

Not detected: Electronic pen adapter is not connected.

Confirming...: Immediately after connecting an electronic pen adapter and the built-in WhiteBoard "Easy WhiteBoard" is starting up.

Detected: Electronic pen adapter is connected.

Touch-Pen Mode

Select an appropriate setting for the function of the electronic pen used.

Touch Only: Contact-type Touch Pen

Touch & Remote: Contact-type Touch Pen and remote pointer

WHITEBOARD function

Sets the built-in WhiteBoard (WhiteBoard mode) function. When this is set to "On", the built-in WhiteBoard function is enabled and the WHITEBOARD input can be selected.

Quick WHITEBOARD launch

When this is set to "ON", the built-in WhiteBoard will be in the standby mode when the plasma display is in the standby mode (power OFF with remote control) and the start up is quicker.

Note:

This setting is automatically turned "On" and cannot be changed in the following cases.

When the power is supplied to the slot

When "Control I/F Select" is set to "LAN"

When "WEB Control" is set to "On"

When "Standby pen charging mode" is set to "On"

SLOT INPUT – NETWORK

Set "On" or "Off" for each input terminal.

If you switch to the input terminal that is set to "On", the mode becomes Touch Pen mode.

"Touch-Pen: On" is displayed in Touch Pen mode.

Notes:

- The picture quality changes according to the settings of "Touch-Pen Mode" and On/Off state of each input terminal.
- The electronic pen cannot be used during Digital Zoom. (see page 20)
- When using the electronic pen, adjust "Pos./Size" so that the screen of the computer can be correctly displayed. (see page 23)

Setting the Remote Control

You can also turn Touch Pen mode On/Off with the FUNCTION buttons on the remote control. (see page 44)

In Touch Pen mode, the menus and functions are restricted as follows.

Pos./Size menu		1:1 Pixel Mode: On Over scan: Off
Picture menu		Picture Mode: "Normal" or "Dynamic" only. (see page 26)
Setup menu	Extended life settings	Picture Mode: "Normal" or "Dynamic" only. (see page 39)
Options menu		Display size: Unavailable Rotate: Unavailable
ASPECT Controls		16:9

Standby pen charging mode

Sets the power supply for the electronic pen charging terminal (CHARGE, MEMORY/(CHARGE)) in the standby mode (power OFF with remote control).

Off: Turns off the charging terminal power in the standby mode.

On[4hrs]: Turns ON the charging terminal power for 4 hours after entering standby mode.

On: Leaves the charging terminal power ON in standby mode so that the pen can be charged.

Pairing

Registers an electronic pen to electronic pen adapter.

Up to four electronic pens can be registered for an electronic pen adapter.

For the details of the pairing, please refer to "Operating Instructions, Electronic Pen Operations".

Note:

Make sure the electronic pen adapter is connected to the display.

If no electronic pen has been registered, the screen of procedure 3 appears first. Follow the instructions on the screen to register an electronic pen.

1 Select "Pairing" in "Touch-Pen Settings" and press  button.

2 Select "Pairing" and press  button.

3 While pressing both the remote drawing and the remote clearing buttons of the electronic pen, press the Power switch.

To cancel the pairing, select "Cancel".

4 When the electronic pen pairing is completed, select "Return" and press  button.

5 Select "Close" and press  button.

[Unpairing]

Unpairs all paired electronic pens.

1 Select "Unpairing All" in "Pairing Tool" and press  button.

2 Select "Yes" and press  button.

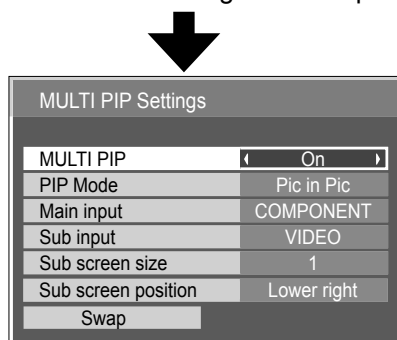

MULTI PIP Settings

Set the two screen display function.

Two screen display function ➡ MULTI PIP (page 21)

Select “MULTI PIP Settings” in “Setup” menu and press  button.

MULTI PIP

Set this “ON” to have two screen display. Various settings such as “PIP Mode” can be set.

PIP Mode

Sets the two screen display mode.

Pic in Pic: Displays two input images combined.

Pic in WHITEBOARD: Displays the built-in WhiteBoard with the other input image combined. Main screen is fixed to WHITEBOARD.

Main input

Sets the input image for the main screen.

Sub input

Sets the input image for the sub screen.

Sub screen size

1 (small) - 4 (large): Sets the size of the sub screen.

Sub screen position

Sets the display position of the sub screen.

Swap

Swap the main and sub screens.

Note:

When “Pic in WHITEBOARD” is selected, “Swap” cannot be used.

Screensaver (For preventing image retention)

Do not display a still picture, especially in 4:3 mode, for any length of time.
If the display must remain on, a Screensaver should be used.

1 Select "Screensaver" in "Setup" menu and press  button.

2 Function selection

Press to select Function.

Press to select the desired function.

→ Negative image ↔ Scrolling bar only <→
→ White screen ↔ Overlay scrolling bar <→

Negative image : Negative image will be displayed on the screen.

Scrolling bar only : A white bar will scroll from left to right. The image won't be displayed.

Overlay scrolling bar : The brightness of the image will be decreased and a white bar will scroll on it.

White screen : The whole screen will be white.

Note: Overlay scrolling bar is not effective during two screen display.

3 Mode selection

Press to select Mode.

Press to select each mode items.

→ Standby after SCR Saver: Operates while Screensaver duration, and display enters standby mode.
↕
On : Operates when Start is selected and the ACTION (■) button is pressed.
↕
Off
↕
Interval : Operates when Periodic Time and Operating Time are setup and those times arrive.
↕
Time Designation : Operates when Start Time and Finish Time are setup and those times arrive.

4 Start setting

When the Mode is set to On, press to select Start.

Press to start Screensaver.

The menu screen will disappear and the Screensaver will be activated. **To stop the Screensaver under On, press the R button or any buttons on the main unit.**

Note: When the display is turned off, the Screensaver will be deactivated.

Setup of Screensaver Time

After selecting Time Designation, Interval or Standby after SCR Saver, the relevant Time Setup will become available for selection and the Operating Time may be set. (Time cannot be set when “Mode” is “On” or “Off”.)

Press to select Start Time / Finish Time
(when Time Designation is selected).
Press to select Periodic Time / Operating Time
(when Interval is selected).
Press to select Screensaver duration
(when Standby after SCR Saver is selected).
Press to setup.
▶ button: Forward
◀ button: Back

	Time 15:00
Start	
Function	Scrolling bar only
Mode	Standby after SCR Saver
Screensaver duration	◀ 6:15 ▶

Notes:

- Pressing “◀” or “▶” button once changes the Time 1 minute.
[However, switching occurs every 15 minutes when Periodic Time is selected.]
- Pressing “◀” or “▶” button continuously changes the Time by 15 minutes.
- “Screensaver duration” of the “Standby after SCR Saver” can be set from 0:00 to 23:59. When this is set to “0:00”, “Standby after SCR Saver” will not be activated.

Note: Timer function will not work unless “Time” is set.

Reduces screen image retention

Extended life settings

The following settings are setup to reduce image retention:

Select “Extended life settings” in “Setup” menu and press  button.

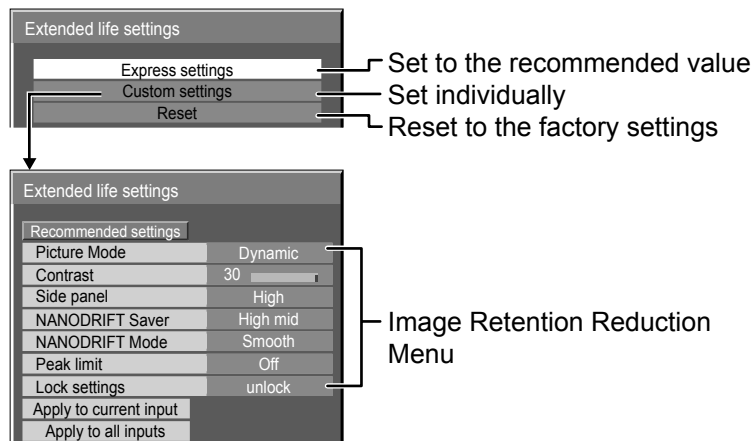

Image Retention Reduction Menu

“Extended life settings” enables you to set the following 5 menus (Image Retention Reduction Menu) as recommended values or set them individually.

Picture Mode

Contrast

“Picture Mode” and “Contrast” are same as “Picture” menu items (see page 26). The settings of this menu will be reflected to the “Picture” menu.

Side panel

Do not display a picture in 4:3 mode for an extended period, as this can cause an image retention to remain on the side panels on either side of the display field.

To reduce the risk of such an image retention, illuminate the side panels.

This function may be applicable to the non-picture area.

- Off:** Darken both ends.
Low: Make it dark gray.
Mid: Make it gray.
High: Make it light gray.

Notes:

- To reduce the occurrence of image retention, set the Side panel to High.
- The side panel may flash (alternate black/white) depending on the picture being shown on the screen. Using Cinema mode will reduce such flashing.

Reduces screen image retention

NANODRIFT Saver

Moves the display position of the screen slightly to reduce image retention on the display panel.

Min–Max: NANODRIFT Saver operates. The display position of the screen moves at set time intervals. You can set the screen movement range. Some of the screen may appear to be missing as a result of this operation. If you change the value, a mask is displayed in the range where the picture is missing as a result of position movement.

When “NANODRIFT” Image Retention Reduction is operating, “NANODRIFT” is displayed.

Note:

This function does not work in the following cases.

When in digital zoom mode

NANODRIFT Mode

Sets the operation mode of NANODRIFT Saver.

Smooth: Moves by 1/16 dot

Pixel: Moves by 1 dot

Peak limit

On: Suppresses image contrast (peak brightness).

Note: When a still picture is viewed for an extended time, the screen may become slightly darker. (see page 58)

Express settings

Set the “Image Retention Reduction” menu to the recommended settings.

All menus will be locked.

Picture Mode: Normal

Contrast: Recommended setting for each model

Side panel: High

NANODRIFT Saver: High mid

NANODRIFT Mode: Smooth (“Pixel” when Touch Pen or Touch Panel mode)

Peak limit: On

1 Select “Express settings”.

2 Select the input to apply the settings.

3 Select “Yes”.

Custom settings

Set the individual “Image Retention Reduction” menu.

1 Select “Custom settings”.

2 To set each menu to the recommended setting: Select “Recommended settings”.

Each menu will be set as same as the “Express settings”.

3 Set each menu.

4 To lock each menu setting: Set the “Lock settings” to “Lock”.

When a menu is locked, it is grayed out and cannot be set.

“Picture Mode” and “Contrast” will no longer be able to set in the “Picture” menu, and they are labeled with icon to indicate their locked status. Also, “Normalise”, “Memory save” and “Memory load” are not available.

Touch Pen mode when a menu is locked

When a menu is locked, “Touch-Pen Settings” are disabled and Touch Pen mode cannot be set.

5 Select the input to apply the settings.

6 Select “Yes”.

Reset

Reset the “Image Retention Reduction” menu to the factory settings. Each menu will be unlocked.

1 Select “Reset”.

2 Select the input to reset the settings.

3 Select “Yes”.

ECO Mode settings

Select "ECO Mode settings" in "Setup" menu and press  button.

ECO Mode

Custom: The menu of power consumption reduction is individually set.

On: The following fixed values are set to the menu of power consumption reduction. Individual setting is not available.

Power save: On

DVI-D Power management: On

PC Power management: On

No signal power off: Enable

Using Remote Control

When  is pressed, the "ECO Mode" setting changes.

ECO Mode On

Custom settings

The menu of the power consumption reduction is individually set. This setting is enabled when "ECO Mode" is set to "Custom".

Power save

When this function is turned On, luminous level of the Plasma Display is suppressed, so power consumption is reduced.

Sensor: The luminous level of the Plasma Display is automatically adjusted according to the viewing environment.

Note: In Touch Pen mode, the sensor function is disabled.

PC Power management

When this function is set to On, it operates under the following conditions to turn the power on or off automatically.

When no pictures (HD/VD sync signals) are detected for 60 or so seconds during PC signal input:

→ Power is turned off (standby); the power indicator lights up orange.

When pictures (HD/VD sync signals) are subsequently detected:

→ Power is turned on; the power indicator lights up green.

Notes:

- This function operates only during PC signal input.
- This function is effective when "Sync" is set to "Auto", "Component / RGB-in select" is set to "RGB" and during normal viewing.

DVI-D Power management

When this function is set to On, it operates under the following conditions to turn the power on or off automatically.

When no pictures (sync signal) are detected for 60 or so seconds during DVI signal input:

→ Power is turned off (standby); the power indicator lights up orange.

When pictures (sync signal) are subsequently detected:

→ Power is turned on; the power indicator lights up green.

Notes:

- This function operates only during DVI signal input.
- This function is invalid during input from DVI-D Terminal Board (TY-FB11DD).
- Depending on the type of terminal board equipped, this function may be invalid.

No signal power off

Equipment power supply is turned Off when there is no signal.

When this is set to "Enable", the power supply of the unit goes Off 10 minutes after the input signals stop.

Customizing the Input labels

This function can change the label of the Input signal to be displayed. (see page 16)

Select "Input label" in "Setup" menu and press  button.

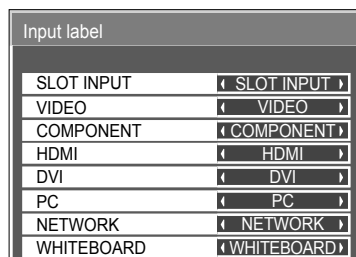

Image input [SLOT INPUT]*1	Input label SLOT INPUT / DVD1 / DVD2 / DVD3 / DVD4 / Blu-ray1 / Blu-ray2 / Blu-ray3 / Blu-ray4 / CATV / VCR / STB / (Skip)
[VIDEO]	VIDEO / DVD1 / DVD2 / DVD3 / DVD4 / Blu-ray1 / Blu-ray2 / Blu-ray3 / Blu-ray4 / CATV / VCR / STB / (Skip)
[COMPONENT]*2	COMPONENT / DVD1 / DVD2 / DVD3 / DVD4 / Blu-ray1 / Blu-ray2 / Blu-ray3 / Blu-ray4 / CATV / VCR / STB / (Skip)
[HDMI]	HDMI / DVD1 / DVD2 / DVD3 / DVD4 / Blu-ray1 / Blu-ray2 / Blu-ray3 / Blu-ray4 / CATV / VCR / STB / (Skip)
[DVI]	DVI / DVD1 / DVD2 / DVD3 / DVD4 / Blu-ray1 / Blu-ray2 / Blu-ray3 / Blu-ray4 / CATV / VCR / STB / (Skip)
[PC]	PC / DVD1 / DVD2 / DVD3 / DVD4 / Blu-ray1 / Blu-ray2 / Blu-ray3 / Blu-ray4 / CATV / VCR / STB / (Skip)
[NETWORK]	NETWORK / (Skip)
[WHITEBOARD]	WHITEBOARD / (Skip)

(Skip): The INPUT button press will skip its input.

*1 "SLOT INPUT" is displayed when a Terminal Board is installed.

*2 "COMPONENT" may be displayed as "RGB" depending on the setting of "Component/RGB-in select". (see page 46)

When a Terminal Board with dual input terminals is installed

"SLOT INPUT" is displayed as "SLOT INPUT A" and "SLOT INPUT B" and independent settings are available.

[SLOT INPUT A]	SLOT INPUT A / DVD1 / DVD2 / DVD3 / DVD4 / Blu-ray1 / Blu-ray2 / Blu-ray3 / Blu-ray4 / CATV / VCR / STB / (Skip)
[SLOT INPUT B]	SLOT INPUT B / DVD1 / DVD2 / DVD3 / DVD4 / Blu-ray1 / Blu-ray2 / Blu-ray3 / Blu-ray4 / CATV / VCR / STB / (Skip)

When a Terminal Board with fixed display (such as Tuner Board) is installed

Only fixed display and (Skip) are available as Input label of "SLOT INPUT".

[SLOT INPUT]	fixed display / (Skip)
--------------	--

Function Button Settings

Set the functions that operates when ^{FUNCTION} 1 2 is pressed.

Select "Function Button Settings" in "Setup" menu and press  button.

• Function Button 1, Function Button 2

The following functions are set to the FUNCTION button.

Note:

Factory settings are as follows.

FUNCTION1 button: Touch-Pen

FUNCTION2 button: Scrolling bar

ECO Mode settings / Signal / On/Off Timer Setup / MULTI PIP Settings

The menu is displayed. (Example: ECO Mode settings)

^{FUNCTION}
1 2

Pressing the FUNCTION button clears the menu.

Scrolling bar

Activates the "Scrolling bar only" screensaver.
After 15 minutes, the display enters standby mode.

To exit this mode, press ^R  button.

INPUT (SLOT)* - INPUT (WHITEBOARD)

Simply press ^{FUNCTION} 1 2 to select the input.

* "INPUT (SLOT)" is displayed when an optional Terminal Board is installed.

When a Terminal Board with dual input terminals is installed, "INPUT (SLOT A)" and "INPUT (SLOT B)" are displayed.

Touch-Pen

Press ^{FUNCTION} 1 2 and turn Touch Pen mode On/Off.

Network Setup

"Network Setup" menu is displayed.

Computer Search

The list of connectable computers on the network is displayed.

Note:

For the network function, refer to "Operating Instructions, Network Operations" and the instruction manual of "Wireless Manager" in use.

AV Mute

Mutes the audio and video. To exit this mode, press any button.

Multi-Live

Switch to the Multi-Live mode when using the "Wireless Manager".

MULTI PIP

Press ^{FUNCTION} 1 2 to turn MULTI PIP On/Off.

• Function Button Guide

The function display setting for the FUNCTION button is configured.

On: Press the FUNCTION button to display the function list of the button.

Off: The function list is not displayed.

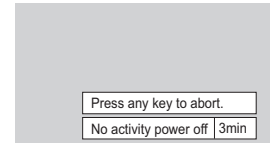

No activity power off

Disable \longleftrightarrow Enable

When this function is set to “Enable”, the power is turned off (standby) automatically when there is no operation of the Plasma Display for 4 hours.

Starting from 3 minutes before the turn off, the remaining time will be displayed.

When the power is turned off due to this function, a message “Last turn off due to 'No activity power off'.” is displayed next time the power is turned on.

Note:

During the screensaver is running, this function is disabled.

Menu Display Duration / OSD Brightness

Set the display time and brightness of the on-screen menu display.

Menu Display Duration: 5 S - 30 S

OSD Brightness: 1 - 5

OSD Language

Select your preferred language.

■ Selectable languages

Display orientation

Sets the fan control, panel drive control, and the display style of on-screen menu for vertical installation.

Landscape

Fan control and panel drive control for horizontal installation.

Portrait

Fan control and panel drive control for vertical installation. On-screen menu will be rotated 90 degrees counterclockwise to be suitable for the setting.

Notes:

- Turn up the power switch for the upward direction when you set Display vertically.
- When you change this setting, fan control and panel drive control will be switched as the power is turned on next time.

Setup for Input Signals

Component / RGB-in select

Component \longleftrightarrow **RGB**

Select to match the signals from the source connected to the Component / RGB or PC input terminals.

Y, P_B, P_R signals \Rightarrow "Component"

RGB signals \Rightarrow "RGB"

Note:

Make setting of the selected input terminal (COMPONENT/RGB IN or PC IN).

YUV / RGB-in select

YUV \longleftrightarrow **RGB**

Select to match the signals from the source connected to the DVI input terminals.

YUV signals \Rightarrow "YUV"

RGB signals \Rightarrow "RGB"

Notes:

- Selection may not be possible, depending on which optional board is installed.
- Make setting of the selected input terminal (SLOT or DVI-D IN).

Signal menu

Notes:

- “Signal” setup menu displays a different setting condition for each input signal.
- Depending on the input signal type, an optional Terminal Board may be required.

Select “Signal” in “Setup” menu and press  button.

For Video (S VIDEO)

Signal [AV]	
3D Y/C Filter (NTSC)	On
Colour system	Auto
Cinema reality	Off
Noise reduction	Off

For RGB

Signal [RGB]	
Sync	Auto
Cinema reality	Off
XGA Mode	Auto
Noise reduction	Off
H-Freq.	63.98 kHz
V-Freq.	60.02 Hz
Signal Format	1280×1024/60i

For Component

Signal [Component]	
Sync	Auto
Cinema reality	Off
XGA Mode	Auto
Noise reduction	Off
H-Freq.	63.98 kHz
V-Freq.	60.02 Hz
Signal Format	1280×1024/60i

For Digital

Signal [Digital]	
Cinema reality	Off
HDMI Range	Auto
Noise reduction	Off
H-Freq.	63.98 kHz
V-Freq.	60.02 Hz
Signal Format	1280×1024/60i

• 3D Y/C Filter (NTSC)

This menu is displayed when BNC Dual Video Terminal Board (TY-FB9BD) is installed to the unit. Set this menu when the moving image looks unnatural during Video (S Video) input signal.

On \longleftrightarrow Off

Note:

When On, this setting only affects NTSC input signals.

• Colour system

\rightarrow Auto \longleftrightarrow PAL \longleftrightarrow SECAM \longleftrightarrow M.NTSC \longleftrightarrow NTSC \leftarrow

Set the colour system to match the input signal. When “Auto” is set, Colour system will be automatically selected from NTSC/PAL/SECAM/M.NTSC.

To display PAL60 signal, select “Auto” or “PAL”.

If the picture image becomes unstable:

With the system set on Auto, under conditions of low level or noisy input signals the image may in rare cases become unstable. Should this occur, set the system to match the format of the input signal.

• Cinema reality

When “On”, the display attempts to reproduce a more natural interpretation of sources such as movie pictures, which are recorded at 24 frames per second.

If the picture is not stable, turn the setting to “Off”.

On \longleftrightarrow Off

Note:

When On, this setting only affects the following signal input:

- NTSC / PAL signal input during Video (S Video) input signal.
- 525i(480i), 625i(575i), 1125(1080)/60i signal input during “Component” input signal.

• XGA Mode

This menu is displayed when the input signal is analog (Component/PC). This unit supports three types of XGA signals with 60Hz vertical frequency having different aspect ratios and sampling rates (1,024 × 768 @ 60Hz, 1,280 × 768 @ 60Hz and 1,366 × 768 @ 60Hz).

Auto \longleftrightarrow 1024×768 \longleftrightarrow 1280×768 \longleftrightarrow 1366×768

Auto: Automatically selected from 1024×768/1280×768/1366×768.

Switch the setting to suit the input signal for better display depends on the angle of view or display resolution condition.

Note:

After making this setting, be sure to make each adjustment (such as “Auto Setup”) on the “Pos./Size” menu as necessary. (see page 23)

- **Sync**

This function operates only during input from PC IN terminal.

- **Setting RGB sync signal**

Confirm that the input is set to RGB input (this setting is valid only for RGB input signal).

Auto: The H and V sync or synchronized signal is automatically selected. If both input, it is selected the H and V sync.

on G: Uses a synchronized signal on the Video G signal, which is input from the G connector.

- **Setting Component sync signal**

Confirm that the input is set to Component input (this setting is valid only for Component input signal).

Auto: The H and V sync or synchronized signal is automatically selected. If both input, it is selected the H and V sync.

on Y: Uses a synchronized signal on the Video Y signal, which is input from the Y connector.

- **Note:**

Signals input to COMPONENT/RGB IN terminals correspond to Sync on G or Sync on Y.

- **SDI Through**

Set the active through function of the Dual Link HD-SDI Terminal Board (TY-FB11DHD).

On ↔ **Off**

On: Enables active through.

Off: Disables active through.

- **Note:**

Settings can only be performed for this menu when a slot mounted with a Dual Link HD-SDI Terminal Board (TY-FB11DHD) is selected.

- **HDMI Range**

Switches the dynamic range according to the input signal from HDMI terminal.

Video(16-235) ↔ **Full(0-255)** ↔ **Auto**

Video(16-235): If the input signal is the video range, Example: HDMI terminal output for DVD player

Full(0-255): If the input signal is full range, Example: HDMI terminal output for personal computer

Auto: Switches the dynamic range automatically between "Video(16-235)" and "Full(0-255)" according to the input signal.

- **Note:**

This function can be set only for HDMI signal input.

• Noise reduction

Sets the following three NR (Noise Reduction) functions together.

P-NR, Mosquito NR, Block NR

Press to select "Noise reduction".

Press to select "Off", "Min", "Mid", "Max", "Advanced".

Noise reduction [Off]

Advanced NR

Sets the three NR functions separately.

1

Press to select "Advanced".

Press to enter Advanced NR.

Noise reduction [Advanced]

2

Press to select P-NR, Mosquito NR or Block NR.

Press to select "Off", "Min", "Mid", "Max".

Advanced NR [AV]
P-NR [Off]
Mosquito NR [Off]
Block NR [Off]

Advanced NR [RGB]
P-NR [Off]
Mosquito NR [Off]
Block NR [Off]

Advanced NR [Component]
P-NR [Off]
Mosquito NR [Off]
Block NR [Off]

Advanced NR [Digital]
P-NR [Off]
Mosquito NR [Off]
Block NR [Off]

P-NR: Automatically reduces unwanted picture noise.

Mosquito NR: Reduces mosquito noise around subtitles on MPEG videos.

Block NR: Reduces block noise when playing MPEG videos.

Note:

Noise reduction cannot be adjusted while a PC signal is being applied.

• Input signal display

Displays the frequency and the type of the current input signal.

This display is valid only for Component / RGB / PC and Digital input signal.

Display range:

Horizontal 15 - 110 kHz

Vertical 48 - 120 Hz

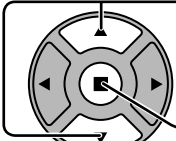

The dot clock frequency is displayed during DVI signal input.

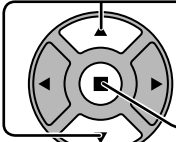

H-Freq. 63.98 kHz
V-Freq. 60.02 Hz
Signal Format 1280×1024/60i

H-Freq. 63.98 kHz
V-Freq. 60.02 Hz
Dot Clock Freq. 108.0 MHz
Signal Format 1280×1024/60i

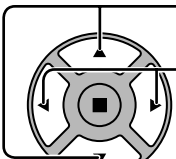

Options Adjustments

1  Press to display the Setup menu.

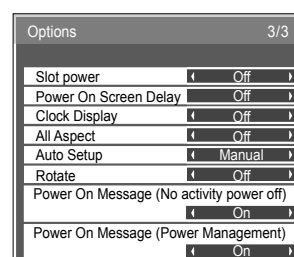

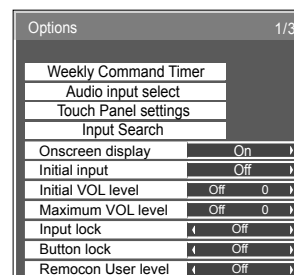

2  Press to select "OSD Language".
Press for more than 3 seconds.

3  Press to select "Options".
Press to display the Options menu.

4  Press to select your preferred menu.
Press to adjust the menu.

5  Press to exit from Options menu.

Item	Adjustments
Weekly Command Timer	Sets Weekly Command Timer. (see page 53)
Audio input select	Set up the sound when an image input is selected. (see page 55)
Touch Panel settings	Set while using Touch Panel (available as an option). (see page 56)
Input Search	Set auto input switching for when there is no signal. (see page 57)
Onscreen display	On: Displays all the following on screen. <ul style="list-style-type: none"> • Power on display • Input signal switch display • No signal display • Mute and the remaining time of off-timer after  was pressed. Off: Hides all the items above from view.
Initial input	Adjusts the input signal when the unit is turned on. Off ↔ SLOT INPUT *1 ↔ VIDEO ↔ COMPONENT *2 ↔ HDMI ↔ DVI ↔ PC ↔ NETWORK ↔ WHITEBOARD *1 "SLOT INPUT" is displayed when an optional Terminal Board is installed. When a Terminal Board with dual input terminals is installed, "SLOT INPUT A" and "SLOT INPUT B" are displayed. *2 "COMPONENT" may be displayed as "RGB" depending on the setting of "Component/RGB-in select". (see page 46) Notes: <ul style="list-style-type: none"> • Only the adjusted signal is displayed. (see page 16) • This menu is available only when "Input lock" is "Off".
Initial VOL level	Press   button to adjust the volume when the unit is turned on. Off ↔ On Off: Sets normal volume. On: Sets your preferred volume. Notes: <ul style="list-style-type: none"> • When "Maximum VOL level" is "On", the volume can only be adjusted between 0 and your maximum range. • You can hear the changed volume regardless of your volume setting before opening the options menu if you adjust the volume when "Initial VOL level" is "On" and cursor is on the menu.
Maximum VOL level	Press   button to adjust the maximum volume. Off ↔ On Off: Sets auto maximum volume. On: Sets your preferred maximum volume. Notes: <ul style="list-style-type: none"> • If the "Maximum VOL level" is set lower than the "Initial VOL level", the "Initial VOL level" automatically becomes the same as the "Maximum VOL level". • The volume display can go up to 63 regardless of the settings. • You can hear the changed volume regardless of your volume setting before opening the options menu if you adjust the volume when "Maximum VOL level" is "On" and cursor is on the menu.

Options Adjustments

Item	Adjustments
Studio W/B	Off: Nullify all the settings adjusted. On: Sets the colour temperature for TV studio. Note: Valid only when the "Warm" is set as "White balance" in Picture menu.
Studio Gain	Sharpens the contrast for a better view when a part of the image is too light to see. Off: Disables "Studio Gain". On: Enables "Studio Gain". Note: This setting is valid only when the input signals are as follows: Component Video, RGB (analog), SDI, HDMI
Slot power	Off \longleftrightarrow Auto \longleftrightarrow On Off: Power is not transmitted to the slot power. Auto: Power is transmitted to the slot power only when main power is on. On: Power is transmitted to the slot power when main power is on or in the standby state. Note: In some cases, power is transmitted to the slot power when main power is on or in the standby state regardless of the slot power setting.
Power On Screen Delay	Off \leftrightarrow 1 \leftrightarrow 2 \leftrightarrow 3.... \leftrightarrow 30 You can set the power-on delay time of the displays to reduce the power load, when you press \odot /I to turn on the multiple displays that are set together. Set each display's setting individually. Off: The display will be turned on at the same time as \odot /I is pressed. 1 to 30 (sec.): Set the power-on delay time (second). After pressing \odot /I, the display will be powered on with time delay depending on this setting. Notes: <ul style="list-style-type: none"> During this function is working, the power indicator is blinking green. This function also works when the power recovers from failure or after plugging off and in again the power cord. After you unplug and plug the power cord in while the unit is in standby mode and also the power is being supplied to a terminal board, the unit will start supplying the power to the board with time delay according to the setting. The power indicator lights up red first and it turns orange when the power starts being supplied to the board.
Clock Display	Off: Not display the clock. On: Display the clock. The clock is displayed at the lower left of the screen when $\text{RECALL } \odot$ button is pressed.  Note: When "Day/Time Setup" is not set, the clock is not displayed even if "Clock Display" is "On". (see page 33)
All Aspect	Sets All Aspect mode (advanced aspect setting) or default aspect mode. With each press of $\text{ASPECT } \text{DB}$ button, the aspect changes in the selected mode. Off: Default aspect mode On: All Aspect mode Aspect mode of each setting is as follows: (Example: HD signal) Off 4:3 \rightarrow 4:3 Full \rightarrow Zoom1 \rightarrow Zoom2 \rightarrow Zoom3 \rightarrow 16:9 \rightarrow 14:9 \rightarrow Just On 4:3 (1) \rightarrow 4:3 (2) \rightarrow 4:3 Full \rightarrow Zoom1 \rightarrow Zoom2 \rightarrow Zoom3 \rightarrow 16:9 \rightarrow 14:9 \rightarrow Just1 \rightarrow Just2
Auto Setup	Sets the operational mode of the automatic position adjustment in the Pos./Size menu. Manual: Automatic position adjustment starts when $\text{AUTO SETUP } \odot$ is pressed on the remote control or automatic position adjustment is executed from the Pos./Size menu. Auto: Other than remote control or menu operation, automatic position adjustment starts: When the display power is turned ON. When the input signal is switched.
Rotate	Off: Does not rotate the image. On: Rotates the image 180 degrees.
Power On Message (No activity power off)	Whether to show/hide No activity power off Precautions at the time of power ON is set. On: The warning precautions are shown at the time of power ON. Off: The warning precautions are not shown at the time of power ON. Note: This setting is enabled only if "No activity power off" is "Enable" (see page 45).
Power On Message (Power Management)	Whether to show/hide an information message that tells the power has been turned off by Power Management when the power is set to ON. On: The information is shown at the time of power ON. Off: The information is not shown at the time of power ON. Note: This setting is enabled only if "PC Power management" or "DVI-D Power management" is "On" (see page 42).

Normalisation

When both main unit buttons and remote control are disabled due to the "Button lock" or "Remocon User level" adjustments, set all the values "Off" so that all the buttons are enabled again.

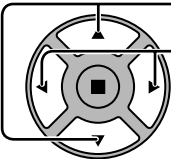

Press the  button on main unit together with  button on the remote control and hold for more than 5 seconds. The "Shipping" menu is displayed and the lock is released when it disappears.

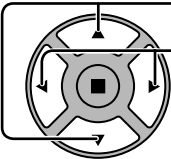

Weekly Command Timer

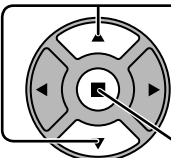

You can set 7-day timer programming by setting time and command.

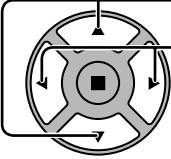

Note:

Before setting Weekly Command Timer, set Day/Time Setup. (see page 33)

- 1**  Press to select Function.
Press to select "On".
- Note:**
- When Function is set to On, On/Off Timer Setup (see page 33) is unavailable and Interval / Time Designation in Mode of Screensaver (see page 37) cannot be selected.

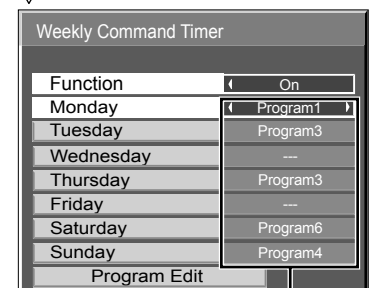

- 2**  Press to select a day.
Press to select a program number.
- Note:**
- You can set the program from 1 to 7. --- indicates unset.

- 3**  Press to select Program Edit.
Press to show the Program Edit screen.

- 4**  Press to select Program.
Press to change the program numbers (1-7).

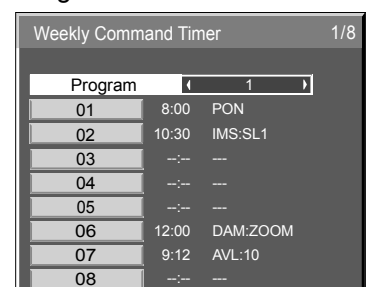

↓ Press ACTION (■) button

Weekly Command Timer		
Program 1		
Command No	02	
Time	◀ 10:30 ▶	
Command	◀ IMS:SL1 ▶	

Notes:

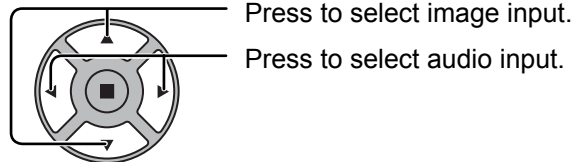

- Command is performed in order of execution time, regardless of the command number.
- If a command execution time overlaps with that of other commands, these commands are performed in number order.
- Pressing , Time becomes --:-- and Command becomes ---.

Note:

Press  to return to the previous screen.

Audio input select

Set up the sound when an image input is selected.

↓ Press ACTION (■) button

Image input	Audio input
[SLOT INPUT]*1	SLOT INPUT / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO
[VIDEO]	SLOT INPUT / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO
[COMPONENT]*2	SLOT INPUT / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO
[HDMI]	SLOT INPUT / AUDIO 1 / HDMI / AUDIO 2 / NETWORK / NO AUDIO
[DVI]	SLOT INPUT / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO
[PC]	SLOT INPUT / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO
[NETWORK]	SLOT INPUT / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO
[WHITEBOARD]	SLOT INPUT / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO

NO AUDIO: No audio input (Mute)

*1 "SLOT INPUT" is displayed when a Terminal Board is installed.

*2 "COMPONENT" may be displayed as "RGB" depending on the setting of "Component/RGB-in select".
(see page 46)

When a Terminal Board with dual input terminals is installed

"SLOT INPUT" is displayed as "SLOT INPUT A" and "SLOT INPUT B" and independent settings are available.
To set other image inputs, you can select "SLOT INPUT A" and "SLOT INPUT B".

Image input	Audio input
[SLOT INPUT A]	SLOT INPUT A / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO
[SLOT INPUT B]	SLOT INPUT B / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO
[VIDEO]	SLOT INPUT A / SLOT INPUT B / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO
[COMPONENT]	SLOT INPUT A / SLOT INPUT B / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO
[HDMI]	SLOT INPUT A / SLOT INPUT B / AUDIO 1 / HDMI / AUDIO 2 / NETWORK / NO AUDIO
[DVI]	SLOT INPUT A / SLOT INPUT B / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO
[PC]	SLOT INPUT A / SLOT INPUT B / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO
[NETWORK]	SLOT INPUT A / SLOT INPUT B / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO
[WHITEBOARD]	SLOT INPUT A / SLOT INPUT B / AUDIO 1 / AUDIO 2 / NETWORK / NO AUDIO

When Image input and Audio input differ from each other, the Audio input is displayed as below.

Notes:

- HDMI Audio is selectable only for HDMI Input.
- You cannot set audio of B for SLOT INPUT A, or audio of A for SLOT INPUT B.

Touch Panel settings (Settings when using Touch Panel)

The mode to restrict NANODRIFT Saver (see page 40) operation when using Touch Panel (available as an option) is set up.

↓ Press ACTION (■) button

Set "Touch Panel mode" to "On".

Calibration mode

This setting is used in calibrating a touch panel.

You can configure the setting if "Touch Panel mode" is "On".

Select "Calibration mode" and then press ■.

When the menu is not displayed (normal screen)

Hold down  for over 3 seconds.

The screen is displayed in the middle and NANODRIFT is deactivated for 180 seconds.

After 180 seconds or when you have the menu displayed with a remote control, Calibration mode is cancelled.

Note:

For information on how to set up Calibration, please see Touch Panel instruction manual.

Input Search

When a signal is not detected, another input with a signal is automatically selected.

↓ Press ACTION (■) button

Input Search

Off: When there is no signal, the input is not switched automatically.

All Inputs: Searches all inputs and switches to an input with a signal.

Input search is executed in the following order.

(Example) When the current input is PC

Priority: Searches "Primary Input" and "Secondary Input" in order and switches to an input with a signal.

"Searching..." is displayed during the input search.

Primary Input, Secondary Input

Set the input to search when "Priority" is selected.

(NONE) <=> SLOT INPUT* <=> VIDEO <=> COMPONENT <=> HDMI <=> DVI <=> PC <=> NETWORK

* "SLOT INPUT" is displayed when an optional Terminal Board is installed.

When a Terminal Board with dual input terminals is installed, "SLOT INPUT A" and "SLOT INPUT B" are displayed.

Notes:

- This menu is available only when "Input lock" is "Off". (see page 51)
- If the input is changed by this function, the last input is selected when the power is turned on next time.
If you wish to retain the original input when the power is turned on, set "Initial input" to the original input.
(see page 50)

Troubleshooting

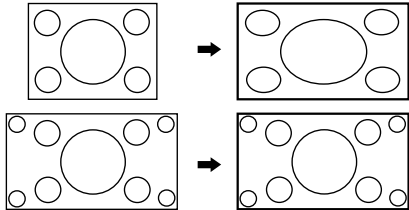

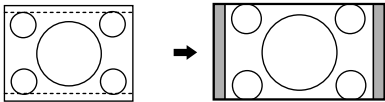

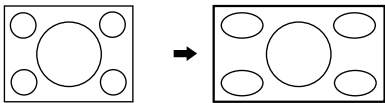

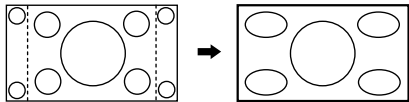

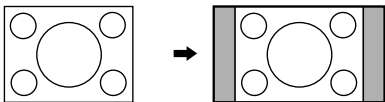

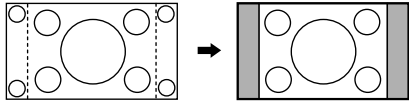

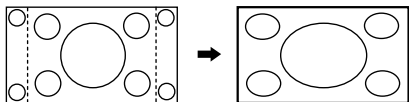

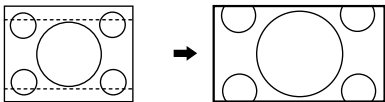

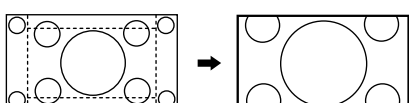

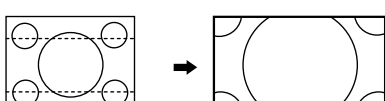

Before you call for service, determine the symptoms and make a few simple checks as shown below.

Symptoms		Checks
Picture	Sound	
 Interference	 Noisy Sound	Electrical Appliances Cars / Motorcycles Fluorescent light
 Normal Picture	 No Sound	Volume (Check whether the mute function has been activated on the remote control.) Check if speakers are connected properly.
 No Picture	 No Sound	Not plugged into AC outlet Not switched on Picture and Brightness/Volume setting (Check by pressing the power switch or stand-by button on the remote control.)
 No Picture	 Normal Sound	If a signal with a non-applicable colour system format, or frequency is input, only the input terminal indication is displayed.
 No Colour	 Normal Sound	Colour controls set at minimum level (see page 26, 27) Colour system (see page 47)
No remote control operations can be performed.		Check whether the batteries have discharged completely and, if they have not, whether they were inserted properly. Check whether the remote control sensor is exposed to an outdoor light or a strong fluorescent light. Check whether the remote control designed specifically for use with the unit is being used. (The unit cannot be operated by any other remote control.)
A cracking sound is sometimes heard from the unit.		If there is nothing wrong with the picture or sound, this is the sound of the cabinet undergoing very slight contractions in response to changes in the room temperature. There are no adverse effects on the performance or other aspects.
The top or bottom of the picture on the screen is cut off when I use the zoom function.		Adjust the position of the picture on the screen.
Areas at the top and bottom of the screen where the image is missing appear when I use the zoom function.		When using a video software program (such as a cinema size program) with a screen wider than one in the 16:9 mode, blank areas separate from the images are formed at the top and bottom of the screen.
I can hear sounds coming from inside the unit.		When the power is turned on, a sound of the display panel being driven may be heard: This is normal and not indicative of malfunctioning.
Parts of the unit become hot.		Even when the temperature of parts of the front, top and rear panels has risen, these temperature rises will not pose any problems in terms of performance or quality.
Power automatically turns off unexpectedly.		Check the settings of "PC Power management", "DVI-D Power management", "No signal power off" and "No activity power off" in the Setup menu. Any of them may be set to "On (Enable)". (see page 42, 45)
Power indicator is blinking in red.		There is possibility of malfunction. Please contact an Authorized Service Center.
This Plasma Display uses special image processing. Hence a slight time lag may occur between image and audio, depending on the type of input signal. However, this is not a malfunction.		

Plasma Display panel

Symptoms	Check
The screen darkens slightly when bright pictures with minimal movements are shown.	The screen will darken slightly when photos, still images of a computer or other pictures with minimal movements are shown for an extended period. This is done to reduce image retention on the screen and the shortening of the screen's service life: It is normal and not indicative of malfunctioning.
It takes a while for the picture to appear.	The unit digitally processes the various signals in order to reproduce esthetically pleasing images. As such, it sometimes takes a few moments for the picture to appear when the power has been turned on, when the input has been switched or when the images for the main picture and sub picture on the two screens are swapped.
The edges of the images flicker.	Due to the characteristics of the system used to drive the panel, the edges may appear to flicker in the fast-moving parts of the images: This is normal and not indicative of malfunctioning.
The brightness on both sides of images in the 4:3 mode changes.	When viewing the side panels at the "High" or "Mid" setting, the brightness on both sides may change depending on the kind of program shown: This is normal and not indicative of malfunctioning.
Some parts of the screen do not light up.	The plasma display panel is manufactured using an extremely high level of precision technology, however, sometimes some parts of the screen may be missing picture elements or have luminous spots. This is not a malfunction.
 Image retention appears	Do not allow a still picture to be displayed for an extended period, as this can cause a permanent image retention to remain on the Plasma Display. Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode. Note: The permanent image retention on the Plasma Display resulting from fixed image use is not an operating defect and as such is not covered by the Warranty. This product is not designed to display fixed images for extended periods of time.
Whirring sounds can be heard from the display unit.	The display unit is fitted with a cooling fan to dissipate heat generated during normal use. The whirring sound is caused by rotation of the fan and is not a malfunction.

List of Aspect Modes

Aspect mode		Picture → Enlarged screen	Description
All Aspect: On	Factory setting All Aspect: Off		
16:9	16:9		The display of the pictures fills the screen. In the case of SD signals, pictures with a 4:3 aspect ratio are enlarged horizontally, and displayed. This mode is suited to displaying anamorphic pictures with a 16:9 aspect ratio.
14:9	14:9		Letterbox pictures with a 14:9 aspect ratio are enlarged vertically and horizontally so that their display fills the screen vertically and is slightly smaller than the screen horizontally. The top and bottom edges of the pictures are cut off. Side panels are displayed at the left and right edges of the screen.
Just ----- Just1	Just		Pictures with a 4:3 aspect ratio are enlarged horizontally so that the picture distortion is minimized. The display of the areas around the left and right edges of the screen is slightly elongated.
Just2	–		The pictures with a 4:3 aspect ratio among the 16:9 aspect ratio signals are enlarged horizontally so that the picture distortion is minimized. The left and right edges of the pictures are cut off. The display of the areas around the left and right edges of the screen is slightly elongated.
4:3 ----- 4:3 (1)	4:3		Pictures with a 4:3 aspect ratio are displayed with their original aspect ratio. Side panels are displayed at the left and right edges of the screen.
4:3 (2)	–		The pictures with a 4:3 aspect ratio among the 16:9 aspect ratio signals are displayed with their original aspect ratio. The left and right edges of the pictures are masked with side panels.
4:3 Full	4:3 Full		The pictures with a 4:3 aspect ratio among the 16:9 aspect ratio signals are enlarged horizontally so that their display fills the screen. The left and right edges of the pictures are cut off.
Zoom ----- Zoom1	Zoom1		Letterbox pictures with a 16:9 aspect ratio are enlarged vertically and horizontally so that their display fills the screen. The top and bottom edges of the pictures are cut off.
Zoom2	Zoom2		The letterbox pictures with a 2.35:1 aspect ratio among the 16:9 aspect ratio signals are enlarged vertically and horizontally so that their display fills the screen. The top and bottom edges as well as the left and right edges of the pictures are cut off.
Zoom3	Zoom3		Letterbox pictures with a 2.35:1 aspect ratio are enlarged vertically and horizontally so that their display fills the screen vertically and is slightly larger than the screen horizontally. The top and bottom edges as well as the left and right edges of the pictures are cut off.

*1: Based on SMPTE 274M standard.

*2: Based on SMPTE RP211 standard.

*3: Based on SMPTE 295M standard.

*4: The input signal is recognized as 1,125 (1,080) / 60p.

*5: When selected the RGB format and 525p signal input to the PC IN terminal, it is recognized as VGA 60Hz signal.

*6: When inputted VGA 60Hz format signal from the other than PC IN terminal, it is recognized as 525p signal.

*7: Based on SMPTE 292M and 372M standards. These signals can be received when the Dual Link HD-SDI Terminal Board (TY-FB11DHD) is installed.

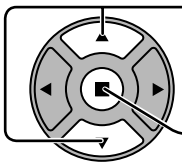

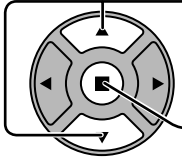

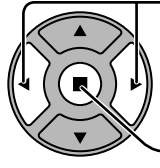

Note: Signals without above specification may not be displayed properly.

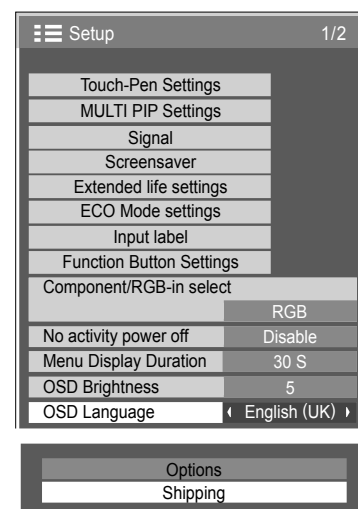

Video input (VIDEO)

	Signal name	Horizontal frequency(kHz)	Vertical frequency(Hz)
1	NTSC	15.73	59.94
2	PAL	15.63	50.00
3	PAL60	15.73	59.94
4	SECAM	15.63	50.00
5	Modified NTSC	15.73	59.94

Shipping condition

This function allows you to reset the unit to the factory setting.

-  Press to display the Setup menu.
-  Press to select "OSD Language".
 Press for more than 3 seconds.
-  Press to select "Shipping".
 Press to display the Shipping menu.
-  Press to select "YES".
 Press to confirm.
- Wait for 10 seconds.
-  Press the power switch (⏻/I) on main unit to turn the power off.

[from the unit]

- Press the MENU button till the Setup menu is displayed.
- Press the Volume Up "+" or Down "-" button to select "OSD Language".
- Press and hold the ENTER button till the Shipping menu is displayed.
- Press the Volume Up "+" or Down "-" button to select "YES".
- Press the ENTER button and wait for 10 sec.
- Press the power switch (⏻/I) on main unit to turn the power off.

PC signals	VGA, SVGA, XGA, SXGA UXGA (compressed) Horizontal scanning frequency 15 - 110 kHz Vertical scanning frequency 48 - 120 Hz	
Connection terminals		
AV IN	VIDEO AUDIO 1 IN	BNC 1.0 Vp-p (75 Ω) Stereo mini jack (M3) × 1 0.5 Vrms, Shared with COMPONENT/RGB IN
	HDMI	TYPE A Connector
COMPONENT/RGB IN	Y/G PB/CB/B PR/CR/R AUDIO 1 IN	BNC with sync 1.0 Vp-p (75 Ω) BNC 0.7 Vp-p (75 Ω) BNC 0.7 Vp-p (75 Ω) Stereo mini jack (M3) × 1 0.5 Vrms, Shared with VIDEO
DVI-D IN	AUDIO 2 IN	DVI-D 24 Pin Content Protection Stereo mini jack (M3) × 1 Compliance with DVI Revision 1.0 Compatible with HDCP 1.1 0.5 Vrms, Shared with PC IN
PC IN	AUDIO 2 IN	High-Density Mini D-sub 15 Pin Y or G with sync 1.0 Vp-p (75 Ω) Y or G without sync 0.7 Vp-p (75 Ω) PB/CB/B: 0.7 Vp-p (75 Ω) PR/CR/R: 0.7 Vp-p (75 Ω) HD/VD: 1.0 - 5.0 Vp-p (high impedance) 0.5 Vrms, Shared with DVI-D IN
SERIAL		External Control Terminal D-sub 9 Pin RS-232C compatible
PEN ADAPTER		For electronic pen adapter
MEMORY/(CHARGE)		For USB memory/electronic pen charging
CHARGE		For electronic pen charging
WIRELESS MODULE		for Wireless module (ET-WM200E)
LAN		RJ45 10BASE-T/100BASE-TX, compatible with PLink™
EXP SP	6 Ω, 16 W [8 W + 8 W] (10 % THD)	8 Ω, 20 W [10 W + 10 W] (10 % THD)
Sound		
Speakers	120 mm × 40 mm × 2 pcs	
Audio Output	20 W [10 W + 10 W] (10 % THD)	
Dimensions (W × H × D)	1,210 mm × 724 mm × 89 mm	1,554 mm × 925 mm × 99 mm
Mass (weight)	approx. 34.0 kg net	approx. 58.0 kg net

Note:

Design and specifications are subject to change without notice. Mass and dimensions shown are approximate.
